## GENERAL REVIEW.

---

MR. WILLIAM S. SEAVERNS, *President of the Board of Trade of the City of Chicago:*

DEAR SIR:—I submit herewith the thirty-second annual report of the Board of Trade of the City of Chicago.

The year 1889 has been one of general prosperity—not that in the realm of speculation the most sanguine hopes have been realized, but that the volume of business has been larger than ever before, and that the gains from the manufactory and from the farm, from transportation and from the interchange and distribution of merchandise, have been reasonably satisfactory. Profits, moreover, have been shared by all classes with a nearer approach to equality, than for many years; hence dissatisfaction among laborers has been limited to very few instances. Crops have been large, mines have yielded liberally, railroad earnings have been uniformly good, and the industry of the citizen has met with abundant reward. The country is comprehending that spasmodic changes in values, produced by temporary and abnormal relations of supply to demand, resulting in immense profits to a few at the expense of the many, do not make a successful year in business; but that a steady volume of trade, keeping in profitable activity all branches of commerce, distributes the fruits of an intelligent industry, and constitutes substantial commercial prosperity.

The course of prices has been exceptional. During nearly every year the mid-winter prices have not materially changed until after the 1st of May, when lake navigation is resumed and some estimate may be intelligently made of crop prospects, but this year prices declined rather rapidly from the 1st of January to the middle of May, amounting to about seven per cent. upon the chief commodities; and, strangely, in view of good crop prospects, prices advanced about three per cent. This was a reaction from an unusual course of the markets from January to May, and indicated that the depression in the earlier months of the year led to unduly

desponding views regarding the influence of full crops. The history of the markets during the last five years rendered the public business pulse very sensitive to depressing indications, while on the other hand any prospect of better prices was looked upon with comparative distrust.

The speculator has witnessed so many disturbing and unlooked for changes during the last few years that he has grown timid, and transforms many things which come within his horizon into fatalities which he must avoid by precipitate retreat or change of front. This accounts for the trend of the markets and the absence of any constancy of confidence in advancing prices. When capital whimpers fear into the ear of speculation, enterprise and faith are shaken, and plans are abandoned.

It is estimated that prices are fully 20 per cent. below those which prevailed at the close of 1860. Reduction in transportation rates, improved methods, and a multiplication of mechanical appliances sufficiently account for the reduction. In November, 1860, the freight on wheat from Chicago to New York was 65 cents per 100 pounds. It is now 25 cents, thus 24 cents per bushel is accounted for, all other things being equal. It should be observed that freight rates have also been materially reduced between Chicago and Western points. That all these radical changes in transportation rates have not benefited the farmer, at first occasions surprise. But this condition arises from the fact that ours is a surplus wheat producing country, and that we cannot, in any event, obtain more for our wheat than the prices at which other great surplus wheat producing countries are willing to sell their wheat. The reduction in transportation cost, therefore, among other things, simply enables us to maintain ourselves in the markets of the world in competition with other surplus wheat producing countries.

It might be interesting to consider at length this phase of the problem, but its discussion does not properly belong here.

In the consideration of the large reduction in prices to which we have alluded, it should be borne in mind that the price of iron and its products, especially of steel and steel rails, has been reduced from 60 to 80 per cent. No one can study these changes without realizing that in this age, competition in the conduct of great industries is an educator, for it has exhausted the facilities along the coarser and superficial lines, and reaches up into the realm of scientific education and acute mental analysis.

The question is not now, how many hours a day a man can work, how early he can rise, and how late he can toil, but how much of cultivated brain he can bring to his task; for brain work, though high-priced, will always successfully compete with cheap and unintelligent labor. Low-priced help is the most expensive element in business conduct, and brain help is the most economical. Great corporations and broad-minded men understand this fully, and do not seek to compete with low-priced labor by low-priced labor, but by applying mental acuteness and scientific investigation to the diversified conduct of business.

#### GRAIN CROPS OF THE UNITED STATES.

The crop of corn was the largest ever harvested, aggregating 2,112,892,000 bushels, valued at \$597,918,829. It was grown on 78,319,651 acres. The yield was equal to 33 bushels per head of population, after allowing 70,000,000 bushels for the average requirements for exportation. Iowa and Illinois are the two largest corn producing States; the former harvesting 349,966,000 bushels, and the latter 259,125,000 bushels; then in the order of production follow the States of Kansas, Missouri, Nebraska and Indiana. The average farm price in the surplus corn producing States was 22 cents per bushel, while in the States of Iowa, Kansas and Nebraska, the average price was 19, 18 and 17 cents, respectively.

The low average yield of this crop is ascribed to meteorological causes rather than to a diminution of fertility. There have been several seasons of drought, notably in 1881, when the average yield was 18.6 bushels per acre; in 1887, when it was 20.1 bushels; and in 1886, when it was 22 bushels. The average farm price for 1889 was 28.3 cents per bushel, against 34.1 cents for 1888.

The following table, compiled by the department statistician, shows averages of conditions of the last three crops:

Years.	July.	August.	September.	October.
1887 .....	97.7	80.5	72.3	72.8
1888 .....	93.	95.5	91.2	92.
1889 .....	90.3	94.8	90.9	91.7

The crop of wheat is officially stated at 490,560,000 measured bushels, or 471,460,663 commercial bushels, and is the largest since 1884, having been exceeded in volume but three times in the last decade. The average weight per bushel was 57.7 pounds.

The average farm price was 69.8 cents per bushel, against 92.6 in 1888. Minnesota produced more wheat than any other State, yielding 45,456,000 bushels; next came California with 43,781,000 bushels; then Dakota bringing 41,652,000; followed by Indiana, Illinois and Ohio with 41,187,000, 38,014,000 and 36,865,000, respectively. The entire crop was produced on 38,123,859 acres, and was valued at \$342,491,707. The largest yield per acre was 21.2 bushels, and represented the Colorado crop. The average national yield per acre for 1889 was 12.8 bushels. The proportion of winter wheat raised in this country for the last five years is 65 per cent.

As showing the effect of the improvement of our transportation system in equalizing the values of the great crops, I quote from the report of the United States Agricultural Department, as follows:

“Values decline almost uniformly from east to west, standing highest in those States where industries are most harmoniously developed, and rural production most diversified, and lowest in the newer sections where agriculture is developed along but few special lines of production. An examination of these annual records of State values, for a series of years, will show that they reflect in a remarkable degree one phase of our national development—our transportation systems. Year by year the difference between farm prices in the East and in the West grows less as freight rates are lower and railroad facilities more extended, the margin representing mainly the charges of middlemen and carriers for handling and transportation.

“The following statement of average price per bushel compiled from the records of this Department will show at a glance this tendency toward a gradual leveling of prices of similar products in the different sections of the country where grown :

Year.	New York.			Ohio.			Illinois.			Iowa.			Nebraska.		
	Corn.	Wheat.	Oats.	Corn.	Wheat.	Oats.	Corn.	Wheat.	Oats.	Corn.	Wheat.	Oats.	Corn.	Wheat.	Oats.
1870 .....	87	\$1.41	58	48	\$1.09	38	35	94	32	34	78	30	36	64	30
1875 .....	74	1.31	44	44	1.09	36	34	91	28	27	71	24	20	64	22
1880 .....	57	1.17	44	41	1.02	34	36	95	29	26	82	23	25	73	26
1885 .....	58	.96	36	32	.91	27	28	81	24	24	67	22	19	57	19
1889 .....	49	.90	32	31	.76	23	24	70	19	19	63	16	17	52	15

“This statement shows a difference of 51 cents per bushel in the price received for their corn by the farmers of New York and Nebraska in 1870, against a difference the present year of only 32 cents. In wheat there was, at the earlier date, a difference of 77 cents, now one of but 38 cents. In oats the difference has fallen from 28 to 17 cents per bushel. The improved position of the Western farmer is almost as strikingly exhibited when comparisons are instituted between States even closer together geographically. In 1870 Ohio wheat sold at \$1.09 per bushel, while in Iowa it brought the grower but 78 cents, a difference of 31 cents. In 1889 this difference in farm value has declined to 13 cents. Farmers of New York and the East are at the doors of the great markets for their products, while those of Nebraska and the extreme Northwest have half a continent to ship over to reach the same consumers, but their relative position improves with each decade, as lower freight rates and increased handling facilities overcome distance and bring them nearer the marts of trade.

“The tendency toward a lower level of values, which has been noted and commented on for several years, still continues, and the present returns make the average prices of farm products very low—for many crops the lowest ever reported. The extended and severe agricultural depression now prevailing is reflected in these low prices for the products of the farmers’ labor.”

The crop of oats is estimated at 751,515,000 bushels, produced on 27,462,316 acres, and is valued at \$171,781,008. Although the crop is 50,000,000 bushels greater than that of the preceding year, its valuation is \$25,000,000 less, the average price being 23 cents per bushel, against 26.9 cents in 1888 ; 25.4 cents in 1887 ; and 26.4 cents in 1886.

The unprecedented volume of the corn and oat crops accounts for the low prices of both cereals, and the large movement in the product of hogs and beef. The State of Illinois yielded 145,364,000 bushels, valued at \$27,619,208, largely exceeding in yield that of any other State. Iowa came next, with a crop of 99,459,000 bushels, valued at \$15,913,519 ; then in the order of production followed the States of Minnesota, Wisconsin, Kansas, Ohio, Missouri, New York, Pennsylvania, Michigan, Nebraska, Indiana and Dakota, these being the other great oat-producing States. The

price of oats is the lowest recorded, the average price being 23 cents per bushel. The lowest price previously recorded was in 1878, 24.6 cents, and in 1888, 27.8 cents. The lowest prices prevailed in Kansas and Nebraska, and were 15 cents per bushel.

The crop of rye reached approximately 28,000,000 bushels. The average price was 45.7 cents per bushel, against 59.1 cents in 1888. Never before has the price been below 50 cents per bushel. It is the only grain the home product of which is not equal to the demand, the deficiency being made up by importations chiefly from Canada, and notwithstanding that the area devoted to this grain has been steadily enlarged, the imports have correspondingly increased. The yield per acre of the present crop has been exceeded but twice since 1880. The average was 22.2 bushels, and the quality good.

The crop of barley is estimated at 64,000,000 bushels. The average price is stated at 42.7 cents, against 59.6 per bushel in 1888. The lowest average price ever before realized for this grain was 49 cents in 1884. The average yield per acre was 11.9 per bushel, which is precisely the average for the past nine years.

#### GRAIN ACREAGE OF THE UNITED STATES.

The total area under cultivation in corn, wheat, rye, barley and oats in the United States, in the year 1889, was 148,800,000 acres, and represented 3,432,000,000 bushels of grain, valued at \$1,150,000,000.

The following statement shows the wheat producing portions of the world, and the months of their respective harvests:

January—Australia, Argentine, Chili and New Zealand.

February and March—East India and Upper Egypt.

April—Asia Minor, Cuba, Cyprus, India, Lower Egypt, Mexico, Persia and Syria.

May—Algeria, Central Asia, China, Florida, Japan, Morocco and Texas.

June—Alabama, Arkansas, California, Carolina, Colorado, Georgia, Greece, Italy, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Oregon, Portugal, South of France, Spain, Tennessee, Turkey, Utah and Spain.

July—Austro-Hungary, Bulgaria, France, Germany, Illinois, Indiana, Iowa, Michigan, Minnesota, New York, Nebraska, Ohio, Roumania, South of Russia, Switzerland, South of England and Upper Canada.

August—Belgium, Columbia, Denmark, Great Britain, Holland, Lower Canada, Manitoba and Poland.

September and October—Norway, North of Russia, Scotland and Sweden.

November—Peru and South Africa.

December—Burmah.

#### FARM ANIMALS.

The number of farm animals, as estimated by the Department of Agriculture in its report for January, 1890, was 165,225,623, valued at \$2,418,766,028. This statement shows an increase in numbers of 6,133,042, and a decrease in valuation of \$88,284,030, compared with the corresponding one of 1888.

The number of swine has increased 1,300,000 over that of 1888, but the total valuation is \$47,888,857 less, the average price having declined from \$5.79 to \$4.72 per head. The following statement, taken from the United States agricultural report, shows the heavy shrinkage in stock values which has taken place during the past year :

	1889.	1890.	Increase or Decrease.
Horses.....	\$982,194,827	\$987,516,562	—\$ 3,678,265
Mules.....	179,444,481	182,394,009	+ 2,949,618
Milch cows.....	366,226,376	353,152,133	— 13,074,243
Oxen and other cattle.....	597,236,812	560,625,137	— 36,611,675
Sheep.....	90,640,569	100,659,761	+ 10,019,392
Swine.....	291,307,193	243,418,536	— 47,888,857
Total.....	\$2,507,050,058	\$2,418,766,028	—\$88,284,030

The following are the chief hog producing states in the order of their production : Iowa, Illinois, Missouri, Indiana, Kansas, Texas, Nebraska, Kentucky and Tennessee. Ohio raises more sheep than any other State ; Texas more cattle ; New York, Iowa and Illinois raise more milch cows than are raised in any other three States. The farm valuation of horses raised in Illinois in 1889 was \$83,301,912 : in Iowa, \$79,626,009 ; in Ohio, \$62,570,402 ; in Missouri, \$47,189,413 ; in Kansas, \$46,117,430 ; and the valuation of all the horses raised on farms and ranches in the United States was \$978,516,562. The number of milch cows raised on the farms

was 15,952,883, valued at \$353,152,133 ; the number of oxen and other cattle, 36,849,024, valued at \$560,625,137 ; the number of sheep, 44,336,072, valued at \$100,659,761. The average price of farm animals of each kind on the 1st of January of each year, for a series of years, is given in the following statement :

Year.	Horses.	Mules.	Milch Cows.	Other Cattle.	Sheep.	Swine.
1879.....	\$52 41	\$56 06	\$21 73	\$15 39	\$2 07	\$3 18
1880.....	54 75	61 25	23 27	16 10	2 21	4 28
1881.....	58 44	69 79	23 95	17 33	2 39	4 70
1882.....	58 52	71 35	25 89	19 89	2 37	5 98
1883.....	70 59	79 49	30 21	21 80	2 53	6 75
1884.....	74 64	84 22	31 27	23 52	2 37	5 57
1885.....	73 70	82 38	29 70	23 25	2 14	5 02
1886.....	71 27	79 60	27 40	21 17	1 91	4 25
1887.....	72 15	78 91	26 08	19 79	2 01	4 48
1888.....	71 82	79 78	24 65	17 79	2 05	4 98
1889.....	71 89	79 49	23 94	17 05	2 13	5 79
1890.....	68 84	78 05	22 14	15 21	2 27	4 72

#### FOREIGN COMMERCE.

The value of our imports and exports of merchandise for the fiscal year of 1889 amounted to \$1,487,533,027, showing an increase over that of 1888 of \$67,621,406, made up of an increase of \$21,174,538 in our exports and \$46,446,868 in our imports.

The value of our imports exceeded that of our exports only \$2,730,277, whereas, in the year 1888, the excess of imports over exports was \$28,002,607. From 1876 to 1887, inclusive, there was in each year an excess of exports over imports, averaging \$134,388,312 per year, reaching in 1881 (the year of our largest foreign commerce), \$259,712,718.

The exports of domestic merchandise in 1889 amounted to \$730,282,609 in value, against \$683,862,102 in 1888, of which 72.87 per cent. were of the products of agriculture ; 18.99 per cent. of the products of manufacture ; and 8.14 per cent. of the products of mining, forestry, fisheries, etc. 52.03 per cent. of our exports of domestic merchandise were shipped to the United Kingdom, and 25.85 per cent. to the rest of Europe. The principal items in the list of our exports were cotton, and its manufactured products, valued at \$247,987,914, or 33.96 per cent. of our total domestic exports. The value of breadstuffs exported was \$123,876,661, against \$127,191,687 in 1888 ; of provisions, comprising

meat and dairy products, \$104,122,444, against \$90,047,339 in 1888.

During the last year we increased the value of our exports to the following countries: United Kingdom, Germany, France, British North American Provinces, South America and West Indies. Our exports to Russia, Spain, Belgium and China diminished.

We exported less wheat, wheat flour, unmanufactured tobacco, manufactures of cotton, copper ingots, bars, etc., and refined sugar; and more corn, unmanufactured cotton, provisions, animals, manufactures of wood, refined mineral oils, manufactures of iron and steel, and copper ore, than during the preceding year.

The decline in prices of our chief articles of export is very marked since 1855. The average export price of corn in 1889 was 47 cents per bushel, which is the lowest price since 1855. The average export price of wheat in 1889 was 89.7 cents per bushel, and of cotton, 9.9 cents per pound.

The exports of wheat aggregated 46,414,129 bushels; of corn, 69,592,929 bushels. The exports of provisions, comprising meats and dairy products, were valued at \$45,296,485. We exported 400,224,646 pounds of bacon and hams, valued at \$34,651,847, and 318,242,990 pounds of lard, valued at \$27,329,173, showing a large increase over the exports of like articles in 1888. The average export price of hams and bacon, also of lard, was 8.6 cents per pound. The exports of hog products were valued at \$66,716,097, showing an increase of \$7,416,245, as compared with those of 1888.

Of live animals, we exported 386,494, valued at \$18,374,805, showing an increase of \$5,489,715 in valuation over those exported in the preceding year.

Our exports of oats amounted to 624,226 bushels, valued at \$245,562.

The following statement is submitted, representing the value of exports of provisions, classified as hog products, meats and dairy

products, exhibiting the course of commerce in these articles since 1860 :

Year ended June 30.	HOG PRODUCTS.				Beef Products.	All other Meat Products.	Dairy Products.	Total Value.
	Bacon and Hams.	Pork.	Lard.	Total Hog Products.				
1860....	\$ 2,273,768	\$3,132,313	\$ 4,545,831	\$ 9,951,912	\$ 4,272,500	.....	\$ 2,709,951	\$ 16,934,363

Mr. Edward O. Leach, Director of the Mint, submitted to Congress a report on the production of the precious metals for the calendar year 1889, from which the following figures are taken :

Our exports of gold in 1889 amounted to \$54,930,332, and of silver, \$25,284,662, making total exports of domestic coin and bullion, \$80,214,994. Add to this our exports of foreign coin and bullion and we have a grand total of \$96,641,533.

The exports of gold during the last year were the largest since 1875, and amounted to \$59,952,285. This is partly accounted for by the unprecedentedly large travel from this country to Europe during the past season.

Says Mr. Leach : "It is estimated that some 120,000 people "from the United States visited Paris during the Exposition, and "nearly all of them have carried with them bills of credit which "necessitated settlement by New York bankers with their London "and Paris correspondents. The average amount used in letters

“of credit issued by eight leading banking houses of New York  
“was about \$1,500.”

Our imports of coin and bullion amounted to \$28,963,073, comprising \$10,284,858 in gold and \$18,678,215 in silver.

The total value of our imports for the last fiscal year amounted to \$745,131,652, which is \$2,730,277 more than our exports; and \$21,174,538 in excess of our imports for the year 1888. 54.14 per cent. of our imports came from Europe; 10.46 per cent. came from the West Indies; 12.36 per cent. from South America and 12.51 per cent. from Asia and Oceanica.

The gold product of the United States was 1,587,000 fine ounces of the value of \$32,800,000, against \$33,000,000 in the preceding calendar year. Of the gold product of the United States \$31,959,047 was deposited at the mints for coinage and manufacture into bars.

The silver product of our own mines for the calendar year 1889 was approximately 50,000,000 fine ounces, of the commercial value of \$46,750,000, and of the coinage value of \$64,646,464, against an estimated product for the calendar year 1888 of 45,783,632 fine ounces, of the commercial value of \$43,020,000, and of the coinage value of \$59,195,000, an increase over 1888 of about 4,216,368 fine ounces, of the commercial value of \$3,730,000.

In addition to the silver product of our mines, about 7,000,000 ounces of silver were extracted from lead ores imported into the United States and smelted in this country, and over 5,000,000 ounces from base silver bars imported, principally from Mexico, making the total product of our mines, smelters and refineries about 62,000,000 fine ounces of silver. Of this amount the government purchased for coinage 27,125,357 ounces; there were used in the arts about 6,000,000 ounces; there were exported to Hong Kong, Japan, and the East Indies about 9,000,000 ounces; and there were shipped to London for sale about 20,000,000 ounces.

Colorado still maintains first rank among producing States with an aggregate product of gold and silver of over \$24,000,000. Montana stands next with a product of \$22,894,000. California produced \$14,034,000, of which \$13,000,000 were gold, being about two-fifths of the total gold product of the United States. Utah shows a largely increased product, notably in silver. Idaho and New Mexico report an increased product, and Arizona and Nevada a reduced product for 1889. The gold product of Dakota (South)

increased from \$2,600,000 in 1888 to \$2,900,000 in 1889. Oregon and Washington both report increased products, the former having produced \$1,200,000 in gold. The States of the Appalachian range show a slightly increased product of gold over 1888.

The coinage of the mints for the calendar year 1889 was as follows: Gold pieces, 1,338,012; value, \$21,413,931. Silver dollars, pieces, 34,651,811; value, \$34,651,811. Subsidiary silver coins, pieces, 8,378,811; value, \$844,872.15. Minor coins, pieces, 64,772,283; value, \$1,283,408.49. Total pieces, 109,140,917; value, \$58,194,022.64. In addition to the coinage, gold and silver bars were manufactured at the mints and assay offices as follows: Gold, \$22,349,752.28; silver, \$6,222,751.09; total, \$28,572,503.37. Gold bars were exchanged for gold coin, free of charge, of the value of \$26,913,753.

The quantity of silver purchased for the silver dollar coinage was 27,125,357 fine ounces, costing \$25,379,510, an average cost of 93.56 cents per ounce fine. The amount of silver offered the Treasury Department for sale during the year aggregated 47,965,700 fine ounces.

The total amount of silver purchased for the coinage of the silver dollar from March 1, 1878, to December 31, 1889, was 271,632,503 fine ounces, costing \$291,470,956, an average cost of \$1.06 13 per ounce fine. The coinage of silver dollars for the same period was 349,938,001 pieces. At the average price of silver for the whole period, the cost value of the silver dollar is 82 cents. The average price of silver in London during the calendar year was 93.5 cents per fine ounce, and the average price of fine bars of silver in New York during the same period was 93.6 cents. The highest price reached during the year was  $44\frac{2}{3}$  pence, and the lowest price was  $41\frac{1}{4}$  pence. The shipments of silver to India during the year aggregated \$40,000,000, and the amount realized from the sale of Indian Council bills about \$77,000,000.

The net loss of gold and silver to the United States by excess of exports over imports of the precious metals was as follows: Gold, \$38,886.753; silver, \$14,788,666. Total, \$53,675,419.

#### OCEAN CARRYING TRADE.

6.15 per cent. of the value of our foreign commerce in 1889 was carried in cars and other vehicles; 7.51 per cent. in American

steam vessels ; 6.45 per cent. in American sail vessels ; 69.69 per cent. in foreign steam vessels ; 9.74 per cent. in foreign sail vessels, and .46 per cent. in other craft.

The total value of our foreign commerce during 1889 was \$1,582,339,533. In 1856, 75 per cent. of our foreign commerce was carried in American vessels ; in 1889, but 13.96 per cent.

Any amplification of these facts can hardly add emphasis to their significance. The question which they suggest is, do we desire a larger participation in the carriage of our foreign commerce, and do we wish to revive that national pride which in years gone by hoisted the national ensign over American merchandise on the high seas, and gave to our country a merchant marine, our security in times of peace, and the right arm of our defense in war ?

If it is our desire to yield the ocean carrying trade, with all its emoluments, to other nations, and to become, as a nation, utterly indifferent to our maritime history, and to the doctrine of Jefferson and Washington, that a vigorous merchant marine is indispensable to national safety, then, indeed, we may congratulate ourselves that 69.69 per cent. of our foreign trade is transported in alien steam vessels, and but 7.51 per cent. in steamers flying the national flag.

#### IMMIGRATION.

The number of immigrants which arrived in the United States during the year was 444,427, showing a decrease of 102,462, compared with the preceding year, the decline being principally in the emigration from Great Britain and Ireland, Italy, Norway and Sweden, Austria, Hungary and Germany. Elsewhere may be found a minute statement of the tide of emigration.

#### CHICAGO.

The receipts of grain and of flour in its grain equivalent at Chicago in 1889 aggregated 183,563,208 bushels, showing an increase of 975,020 bushels over like receipts in 1888, which were the largest then recorded ; the increase consisting of 5,324,577 bushels of wheat, 5,711,783 bushels of corn, 136,912 bushels of barley ; and the decrease of 2,282,936 bushels of oats, 161,587 bushels of rye, and 1,723,073 barrels of flour.

The shipments of flour and grain also exhibit a very considerable increase, the total excess over those in 1888 being 22,376,011 bushels, made up of 4,129,556 bushels of wheat, 14,339,253 bushels of corn, 9,574,865 bushels of oats, 56,986 bushels of rye, and 365,758 bushels of barley; the decrease consisted of 1,575,646 barrels of flour, which represented 6,302,584 bushels of wheat. This falling off is attributed to an absence of demand in the local trade, accounted for by an accumulation of stocks in the autumn of 1888, and by heavy shipments direct from Duluth and the "Soo" to Eastern markets.

It should be remembered, however, that a large share of those shipments were controlled by Chicago firms.

This feature of the flour trade is becoming more and more prominent, as it makes a saving of expenses which furnishes a fair profit to the miller.

The provision trade makes a remarkable exhibit. The receipts of cured meats for the past year were nearly double those of 1888, being 279,307,936 pounds, against 146,728,592 pounds for 1888. The receipts of lard amounted to 99,952,687 pounds in 1889, against 70,855,797 pounds in 1888, showing an increase of 29,096,890 pounds.

This remarkable accretion of trade is owing to the rapid development of the meat packing industry at Missouri river points, the most important of which are Sioux City, Omaha, Nebraska City, Lincoln, Kansas City, St. Joseph, Mo., and Atlantic, Iowa. Most of these packing houses have been erected within the last two or three years, and some of them during the last twelve months; and are all represented by Chicago firms.

This, with other similar instances, is instructive as showing that the enterprise of Chicago is not confined to the limits of her municipality, but successfully meets every phase of competition, not only to retain, but to aggressively enlarge her pre-eminence as a business center; her prestige as the chief representative metropolis of the Mississippi valley cannot be wrested from her. It is irrevocably determined by the ability of her citizens, and by her geographical situation.

The receipts of dressed beef also exhibit an enormous increase, aggregating 88,894,033 pounds, which is more than 72 per cent. in excess of those in 1888, the total for 1888 being 51,056,334 pounds.

The shipments for 1889 were 959,727,149 pounds, or 184,243,802 pounds more than in 1888.

For the purpose of comparison I would call your attention to the production in Chicago of cured meats in 1888, which was 442,123,648 pounds, of lard 238,614,118 pounds, and of dressed beef 724,427,013 pounds; and for 1889, as follows: cured meats 459,597,097 pounds, lard 295,886,050 pounds, and dressed beef 870,833,116 pounds; showing an increase of output in 1889 over 1888 as follows: 17,473,449 pounds of cured meats, 57,272,932 pounds of lard, and 146,406,103 pounds of dressed beef.

Deducting shipments from receipts shows an absorption by Chicago of 4,211,867 hogs and 1,763,310 cattle, against 3,169,883 hogs and 1,643,158 cattle in 1888.

Elsewhere under appropriate heads may be found stated the receipts and shipments of other merchandise dealt in by the members of this Association, all constituting a sufficient assurance that all transactions made on this board are based upon property, tangible, defined, deliverable, and, by a system of inspection and storage, absolutely reliable and at hand. Every contract may be amply protected until the time of its fulfillment, when the receipt and delivery of the goods which it covers must be instantly represented by cash on the part of the buyer and by merchandise of contract grade by the seller.

The receipts of live stock for 1889 were larger than during the preceding year, comprising 3,023,281 cattle; 122,968 calves; 5,998,526 hogs; 1,832,409 sheep; and 79,926 horses, received in 265,136 cars. On the 10th of October, 13,727 sheep arrived in one day, and for the week ending October 5th, 82,356 cattle were received.

Mr. Secretary Williams of the Union Stock Yards, to whom I am indebted for the above statements, estimates the value of live stock received during 1889 at \$203,321,924, which is the largest valuation of like receipts ever recorded.

The receipts of grass seeds for 1888 aggregate 75,724,021 pounds, and the shipments 70,276,346 pounds; while those for 1889 were respectively 84,599,331 pounds and 84,961,097, showing that in the year 1889 the shipments exceeded the receipts, and also showing that the receipts for 1889 were 8,875,310 pounds, and the shipments 14,684,751 pounds more than for 1888. This increase was brought about by an unusually large export and domestic

trade during the earlier months of the year. The high prices which prevailed during the previous two years forced jobbers all over the country to restrict their purchases to their actual necessities. Speculation was, therefore, brought almost to a standstill; as a consequence of these conditions, holders of seeds in this city were unable to dispose of their old stocks, and the natural result was a gradual decline in values, to such an extent as to finally induce a very active speculative trade. A large proportion of the receipts and shipments during the first half of the year were of millet and Hungarian seeds.

The extension of the manufacture of butter was phenomenal. The receipts in Chicago for 1889 aggregated 156,315,245 pounds, while the shipments for the same period were 157,425,605 pounds. The receipts for 1888 were 105,402,121 pounds and shipments 116,185,273 pounds; showing an increase in receipts during 1889 of 50,913,124 pounds, and in shipments of 41,240,332 pounds.

The production of this staple in 1888 was so profitable to the dairy farmers that, instead of diminishing their herds at the close of the season, as had been the custom, they determined to keep their stocks for the coming year, and the result has been gratifying. An early spring and abundant rains, resulting in a liberal growth of grass, and a consequent immense supply of milk, have largely contributed to the satisfactory result.

With so large an increase in the output of butter one would naturally expect a diminution in the production of cheese, but the statistics show that the receipts of cheese for 1889 were 61,039,396 pounds and the shipments 47,435,903 pounds, against 52,611,089 pounds and 47,435,903 pounds, respectively, in 1888.

The transactions in eggs also show a substantial increase over those of the previous year. The receipts for 1889 were 273,729 cases, and the shipments 76,607 cases, of thirty dozen each, more than during the preceding year.

The receipts of hides for the year aggregated 101,115,466 pounds, against 98,820,817 pounds in 1888. The shipments amounted to 208,811,369 pounds, against 182,780 pounds in 1888.

Of all the farm products, wool is the only one showing a decline in the volume of receipts and shipments, the former falling off 1,678,134 pounds and the latter 3,486,774 pounds.

From the foregoing summary, and from the fact that an unusually large volume of all kinds of merchandise has been pur-

chased by the farming community during the winter, payment for which has been promptly made, it is evident that the year has been one of prosperity to the agriculturalist, notwithstanding the popular impression to the contrary.

Experience is rapidly teaching the lesson that the prosperity of the farmer depends upon the diversification of his crops, and not upon blindly devoting all his acres to the cultivation of a product which comes into competition with the cheap and degraded labor of other countries.

The number of buildings constructed in Chicago during the year 1889 is 7,590, with a frontage of 181,126 feet, or 34.3 miles, costing \$31,516,000. From 1876 to 1889 there were erected in the city 37,042 buildings, on a frontage of 172 miles, costing \$176,460,779. Among the noted buildings erected is the Auditorium building, which was dedicated with imposing ceremonies on December 9th, the city being honored on that occasion with the presence of the Chief Magistrate and Vice-President of the United States. Forty-one churches were erected during the year.

There are 2,040.71 miles of sidewalks in the city, of which 286.21 were laid during the past year. The total number of miles of streets in the city is 2,047.28, of which 578.15 miles are improved; 107.68 miles were improved during the past year. The parks within the city limits embrace 1,974.16 acres.

The year 1889 will ever be memorable in the history of this city on account of the extensive accession of territory to the original municipal limits, and the consequent increase of population. On the 28th of June, 1889, the city embraced about 44 square miles of territory, containing about 850,000 people. On the day following, June 29th, the city of Lake View, the towns of Hyde Park, Lake, Jefferson and Cicero, aggregating 128.24 miles of territory and about 220,000 people, were annexed to and became part of Chicago, thus constituting one great metropolis extending 24 miles north and south and from  $4\frac{1}{2}$  to  $10\frac{1}{2}$  miles east and west, embracing within its limits more than a million people.

The bonded debt of the city January 1st, 1889, was \$12,561,500.

The mortality rate in this city compares favorably with other large cities. This rate is 17.49 to the 1,000.

The Fire Department maintains its national reputation as being one of the best in the country, and consists of 842 men and

officers, 60 steam fire engines, 16 chemical fire engines, 66 hose carts, 24 hook and ladder trucks, one water tower, 2 fire boats, 83 apparatus stations and 377 horses.

The Public Library stands third among the great libraries of the United States, and contained at the close of the year 153,000 volumes. The total circulation at the close of year was 1,114,964 volumes. The library rooms are very extensively visited by all classes of citizens, of all ages, and is one of the most gratifying and significant features in our municipal life. There are 16 sub-libraries, located in different portions of the city for the convenience of our inhabitants. The Chicago Library was awarded a gold medal at the Paris Exposition, for exhibiting the best plan for conducting libraries.

The original town of Chicago in 1835 comprised 2.55 square miles. Its present area is 172.18 square miles.

The Police Department is all that could be desired in drill, efficiency, courage and character. Its mandate proclaimed in Haymarket Square, commanding peace in the name of the people of Illinois, is historic, and quelled the most malignant attack upon public security known in modern times. A granite statue of a police officer commemorates the tragic event and the supremacy of law in this community.

The number of miles of railway tributary to Chicago is 74,092, and the number centering in the city from the South and East 9,711, making a total of 83,803 miles of railway, connecting Chicago with every State in the Union and with Canada and Mexico.

No other city in the world possesses such extensive facilities for passenger and merchandise traffic. She reaches out in every direction with all the rapidity which modern inventions permit, while with her exceptional water transportation privileges she controls her freight rates in the interest of the producer and consumer alike.

The arrivals for the year numbered 10,804, and the clearances 10,894.

#### WHEAT.

The market for the year has been devoid of any special interest. Prices have been without any outside support, and have lacked that strength and confidence which in past years have induced activity and created an extensive purchasing motive. The movements and features of the market during most of the year have been imparted by local business, which has been the chief reliance

of the farmer and interior grain dealer, in securing a market for his holdings.

The blighting and pernicious influence of the bucket shops has been apparent throughout the year. Many persons from all parts of the country have been decoyed by their plausible pretensions, only to meet with financial destruction. This business, or rather this gauzy pretension, has deluded thousands, and spread demoralization over every man and industry which it has touched. It is an unmitigated evil, and thrives not upon the receipts and shipments of commodities, upon the movement or carrying of merchandise, but solely upon quotations from bona-fide markets, posted upon blackboards. The profitable transaction of this so-called business necessitates the destruction of its patrons, while it is kept alive by the infatuation which sustains the gambling house.

The receipts of wheat for 1889 aggregated 18,762,646 bushels, which were 5,324,547 bushels more than were received in 1888.

The shipments reached 16,138,825 bushels, exceeding those of 1888 by 4,129,556 bushels.

The quantity in store on January 7th of this year was 4,609,709 bushels, against 5,400,066 bushels upon the corresponding date of 1888; and 13,027,247 bushels in 1887. The quantity in sight on the 5th of January, 1889, was 37,923,398 bushels, against 43,857,191 bushels on the corresponding date in 1888.

The receipts for the crop year ending July 31, 1889 (including flour reduced to wheat), amounted to 31,491,656 bushels, as against 48,359,335 bushels received during the preceding year. A full statement of receipts during the crop year may be found on page 96 of this volume.

The opening prices of the year were from 99 $\frac{3}{8}$  cents to \$1.02 $\frac{1}{2}$  per bushel, gradually losing vigor, closing in January at 94 $\frac{1}{8}$  cents. Strength returned after the first week in February, and sales during the last half of the month ranged from \$1.01 to \$1.07. In March the market was a drifting one, with sales at from 93 $\frac{1}{2}$  cents to \$1.04 $\frac{1}{4}$ . The latter price, however, held only for a single day. In April a decided weakness set in, and quotations settled to 79 $\frac{5}{8}$  cents in the latter part of the month. This depression prevailed throughout the month of May, when sales were made from 77 $\frac{1}{4}$  cents to 86 $\frac{1}{2}$  cents. In June the general apathy was prolonged upon a still lower plane of prices, viz., from 75 $\frac{1}{2}$  cents to 83 $\frac{1}{2}$  cents per bushel. The trade in July was very much the same

as during the preceding month. The market continued dull in August, without a single animating feature. September brought no signs of animation, and quotations were without material change. October saw reviving indications. November brought no improvement, presenting but slight fluctuations in prices, and the closing month of the year brought no relief from the marked monotony of the trade, which had characterized the latter half of the year.

The following is a statement of the extreme prices each year for twenty-five years, indicating the month in which such prices obtained:

Year.	Months the Lowest Prices were reached.	Range for the Entire Year.	Months the Highest Prices were reached.
1865.....	December .....	85 @ 1 55	January.
1866.....	February.....	78 @ 2 03	November.
1867.....	August.....	1 55 @ 2 85	May.
1868.....	November .....	1 04½ @ 2 20	July.
1869.....	December .....	76½ @ 2 47	August.
1870.....	April.....	73½ @ 1 31½	July.
1871.....	August.....	99½ @ 1 32	Feb'y, Ap'l and Sept.
1872.....	November .....	1 01 @ 1 61	August.
1873.....	September.....	89 @ 1 46	July.
1874.....	October.....	81½ @ 1 28	April.
1875.....	February .....	83½ @ 1 30½	August.
1876.....	July .....	83 @ 1 26½	December.
1877.....	August.....	1 01½ @ 1 76½	May.
1878.....	October.....	77 @ 1 14	April.
1879.....	January.....	81½ @ 1 33½	December.
1880.....	August.....	86½ @ 1 32	January.
1881.....	January.....	95½ @ 1 43½	October.
1882.....	December .....	91½ @ 1 40	April and May.
1883.....	October.....	90 @ 1 13½	June.
1884.....	December.....	69½ @ 96	February.
1885.....	March.....	73½ @ 91½	April.
1886.....	October.....	69½ @ 84½	January.
1887.....	August.....	66½ @ 94½	June.
1888.....	April.....	71½ @ 2 00	September.
1889.....	June .....	75½ @ 1 08½	February.

## CORN.

The receipts for the year were 79,920,691 bushels, against 74,208,908 bushels in 1888, and the shipments 83,861,818 bushels, against 69,522,565 bushels in 1888. On page 106 may be found a statement of receipts of corn each year for the period of thirty-seven years, by which it may be seen that, with the exception of 1880, the receipts for the year 1889 were the largest ever recorded. Low prices restrict receipts by increasing the quantity fed on the farm, as well as by holding back for better prices.

Receipts are larger from a moderate-sized crop with favorable prices than from a large crop with low prices. With a paying

market the crop is carefully husbanded and every kernel is made available, but with an unremunerative market and a large crop there is great waste. Of late years, owing to unjust freight discriminations, Chicago has been deprived of a very large volume of receipts of this cereal, and much of the grain has been shipped through from junction points at a less rate of freight than if forwarded via Chicago. This is a gross injustice to Chicago, especially as houses here have to a larger extent carried the grain.

The month of largest receipts was that of August, when 11,307,920 bushels were received. In September 10,285,287 bushels were received. The month of smallest receipts was that of January, when 3,694,607 bushels came to hand. In September we shipped 11,343,813 bushels, which was the largest quantity shipped in any month. The C., B. & Q. R. R. brought in by far the largest quantity received by any railway, viz: 21,946,595 bushels. The smallest quantity in store was 746,127 bushels on December 9th, and the largest on September 23d, 4,538,805 bushels.

The quality of the crop was good. Of the number of cars of corn inspected, but 10,600 cars inspected below No. 3, from a total number of 143,023 cars. Of the quantity inspected, received by lake and canal, 29,200 bushels out of 1,726,925 bushels inspected No. 4.

On page 107 may be found a statement of the shipments of corn from Chicago each year, for fifty-two years, ending with 1889.

The year opened with prices at from  $33\frac{3}{4}$  to  $34\frac{1}{8}$  cents per bushel, running through the month of January without very material variation, but gradually strengthening to  $35\frac{5}{8}$  cents on the 31st of the month. February hardly sustained the improvement, recording an easy and indifferent market, closing at from 34 to  $34\frac{3}{8}$  cents. March witnessed a moderate market, with prices ranging from  $33\frac{7}{8}$  to  $35\frac{1}{8}$  cents, closing at  $34\frac{1}{2}$  cents per bushels. In April no decided change in values occurred, prices throughout the month rather favoring the buyer, closing on the last day  $1\frac{1}{2}$  cents per bushel below the market on the 1st of the month. In May the general tone of the market improved and prices recovered about one cent, with a good shipping demand. During June a fair business was transacted without material change in quotations. A substantial improvement came with the advent of July, and a good business was done at from 35 to  $36\frac{1}{2}$  cents per bushel. In August the market weakened

under the influence of large receipts, and prices declined rapidly from the middle of the month until its close, when sales were made at  $32\frac{7}{8}$  cents per bushel. Continued heavy arrivals in September crowded prices down to  $30\frac{7}{8}$  to  $31\frac{1}{8}$  cents per bushel. In October prices dragged along under depressing conditions, showing a slight recovery at the close of the month. November came with a continuance of the same tranquil characteristics, until the 29th of that month, when the market jumped from  $33\frac{1}{2}$  to 56 cents per bushel. On the 30th the market became frantic, goaded on by those who held the stock, as against an extensive short interest, until 60 cents per bushel was obtained as the price which those who inconsiderately sold heavily, were obliged to pay in settlement of their contracts. Not a single failure resulted from the severe necessity so suddenly developed. In December normal conditions were resumed, and a weak market succeeded, closing on the last day of the year at  $29\frac{1}{8}$  to  $29\frac{3}{4}$  cents per bushel.

The following is a table showing the extreme prices each year for twenty-five years, indicating the months in which such prices were obtained :

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865.....	December.....	38 @ 88	January and February.
1866.....	February.....	$33\frac{1}{4}$ @ 1 00	November.
1867.....	March.....	$56\frac{3}{4}$ @ 1 12	October.
1868.....	December....	52 @ 1 02 $\frac{1}{2}$	August.
1869.....	January.....	44 @ 97 $\frac{1}{2}$	August.
1870.....	December.....	45 @ 94 $\frac{1}{2}$	May.
1871.....	December.....	$39\frac{1}{2}$ @ 56 $\frac{1}{2}$	March and May.
1872.....	October.....	$29\frac{1}{2}$ @ 48 $\frac{5}{8}$	May.
1873.....	June.....	27 @ 54 $\frac{1}{4}$	December.
1874.....	January.....	49 @ 86	September.
1875.....	December....	$45\frac{1}{2}$ @ 76 $\frac{1}{2}$	May and July.
1876.....	February.....	$38\frac{3}{8}$ @ 49	May.
1877.....	March.....	$37\frac{3}{8}$ @ 58	April.
1878.....	December.....	$29\frac{7}{8}$ @ 43 $\frac{5}{8}$	March.
1879.....	January.....	$29\frac{3}{8}$ @ 49	October.
1880.....	April.....	$31\frac{1}{2}$ @ 43 $\frac{3}{4}$	November.
1881.....	February.....	$35\frac{3}{4}$ @ 76 $\frac{3}{8}$	October.
1882.....	December.....	$49\frac{1}{2}$ @ 81 $\frac{1}{2}$	July.
1883.....	October.....	46 @ 70	January.
1884.....	December.....	$34\frac{1}{2}$ @ 87	September.
1885.....	January.....	$34\frac{1}{2}$ @ 49	April and May.
1886.....	October.....	$33\frac{1}{2}$ @ 45	July.
1887.....	February.....	33 @ 51 $\frac{1}{2}$	December.
1888.....	December.....	$33\frac{1}{2}$ @ 60	May.
1889.....	December.....	$29\frac{1}{4}$ @ 60	November.

## OATS.

The receipts of oats for the year aggregated 49,901,942 bushels, and the shipments 50,471,836 bushels, as against 52,184,878 bushels and 40,896,971 bushels, respectively, in 1888. The quantity in store at the beginning of the year was 3,456,923 bushels, against 924,325 bushels upon the corresponding time in 1888.

The comparatively inferior quality of the crop, and large supplies, together with uniformly liberal receipts, produced a weak market, which did not exhibit any recovering symptoms until the month of October, when the trade seem to have awakened to the fact that prices were lower than they had been for twenty-five years, and that not even two great crops in succession, and large reserves, would justify selling at the price then reached, viz.: 17 $\frac{3}{4}$  cents per bushel. Accordingly, from this point the downward tendency was checked by the sheer force of the absurdity, under any circumstances, of selling 32 pounds of oats, graded as regular No. 2, stored in Chicago, at 17 to 19 cents. Though this reaction was not very pronounced, it imparted an improved tone to the market for the remainder of the year.

The year opened at 25 $\frac{1}{8}$  cents per bushel, without any essential variation through the months of January, February and March. Towards the middle of April prices declined about one cent per bushel, followed by continued weakness, closing on the last of that month at from 21 to 22 $\frac{1}{2}$  cents. In May prices improved somewhat, though the improvement was not sustained at the close of the month. During the months of June and July the markets were without definite indications, and trading was confined to actual wants for immediate consumption. It was what may be called a summer market. In August the new crop began to move in large volume, and prices became depressed, dropping to 19 $\frac{1}{8}$  cents at the close of the month, which was about the prevailing price for the succeeding month. In October the depression rather increased, sales in the latter portion of this month being made at 17 $\frac{7}{8}$  cents, from which the market rallied, reaching steadily up to 21 cents in the middle of November. The range of prices in December was from 20 $\frac{1}{4}$  to 20 $\frac{3}{4}$  cents per bushel, the very abundant supply preventing any considerable advance.

The number of cars of oats inspected during the year was 57,389, and the number of bushels inspected, received by lake and

canal, 763,300. Of these receipts 6,558 cars and 7,000 bushels inspected below the grade of No. 3.

The following is a statement of the extreme prices each year for twenty-five years, indicating the month in which such prices obtained:

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865.....	December .....	25 @66	January.
1866.....	February .....	21 $\frac{3}{4}$ @44 $\frac{1}{2}$	November.
1867.....	August .....	38 $\frac{1}{2}$ @90	June.
1868.....	October.. .....	41 $\frac{1}{2}$ @74	May.
1869.....	October.....	35 $\frac{1}{2}$ @71	July.
1870.....	September .....	32 $\frac{1}{2}$ @53 $\frac{1}{2}$	May.
1871.....	August .....	27 @51 $\frac{1}{2}$	March and April.
1872.....	October and November	20 $\frac{1}{4}$ @43 $\frac{1}{4}$	June.
1873.....	April .....	23 $\frac{3}{4}$ @40 $\frac{3}{8}$	December.
1874.....	August .....	37 $\frac{1}{4}$ @71	July.
1875.....	December.....	29 $\frac{1}{2}$ @64 $\frac{1}{2}$	May.
1876.....	July .....	27 @35	September.
1877.....	August .....	22 @45 $\frac{3}{4}$	May.
1878.....	October.....	18 @72 $\frac{1}{2}$	July.
1879.....	January .....	19 $\frac{1}{2}$ @36 $\frac{3}{4}$	December.
1880.....	August .....	22 $\frac{1}{2}$ @35	January and May.
1881.....	February .....	29 $\frac{1}{2}$ @47 $\frac{3}{4}$	October.
1882.....	September .....	30 $\frac{1}{2}$ @62	July.
1883.....	September .....	25 @43 $\frac{1}{2}$	March.
1884.....	December.....	23 @34 $\frac{1}{4}$	April.
1885.....	September .....	24 $\frac{1}{4}$ @36 $\frac{1}{2}$	April.
1886.....	October.....	22 $\frac{7}{8}$ @35	January.
1887.....	March and April.. .	23 $\frac{1}{2}$ @31 $\frac{1}{2}$	December.
1888.....	September .....	23 $\frac{1}{8}$ @38	May.
1889.....	October.....	17 $\frac{3}{4}$ @26 $\frac{1}{8}$	February.

#### BARLEY.

The receipts of barley for the year amounted to 12,524,538 bushels, and the shipments to 8,138,109 bushels, against 12,387,526 and 7,772,351 bushels, respectively, in 1888. The quantity of this grain carried in store has been very small throughout the year, most of it being sold by sample, and the receipts being promptly disposed of for shipment and city consumption. It is handled with great discrimination by houses who make a specialty of this business. The facilities, however, for its sale have been somewhat restricted on account of the concentration of demand, and as a result prices have been low and unremunerative.

The poor quality of the crop of 1888 has also contributed to the unusual depression in prices. The standard of inspection of this grain is such as to admit but a small portion of the receipts to the class of No. 2, the contract grade. Hence, speculation is

driven from the market and the buying interest is too generally favored. Speculation improves a market and enhances values. Whenever it is absent there is no life or enterprise. It might be well to inquire into the expediency of making some change in the standard of inspection of this cereal; and yet it is true of barley that in a peculiar sense it is, and must be, sold on its merits and regardless of any grade arbitrarily fixed by a board of inspection.

Nothing was done in No. 2 until July, when prices ranged through the month from 64 to 67 cents per bushel for September delivery. In August it was sold for the same delivery at prices ranging from 63 $\frac{3}{4}$  to 66 cents per bushel. The contract grade kept at about the same price until the latter part of October, when sales were made at from 56 to 58 cents. November's market was about the same. For two days in the month 60 cents was realized. In December the market was devoid of transactions in the contract grade. The trade, however, continued in off grades by sample. Malting grades may be quoted at from 30 to 54 cents per bushel, covering common to fine samples.

In a report upon the cultivation of barley, prepared by M. Tirard, Director of Agriculture in France, it is estimated that the world's annual production of this grain is 825,000,000 bushels, of which three-fourths are grown in Europe, and the remainder in the United States, Canada, Chili, India, Australia, Japan, Tunis and Algeria. The total value is estimated at about \$800,000,000. The countries of largest production are stated as follows: Russia, 129,000,000; the United Kingdom, 93,000,000; Germany, 93,000,000; Austria-Hungary, 88,000,000; Spain, 77,000,000; France, 49,000,000; Norway and Sweden, 22,000,000; Algeria, 60,999,000, and Egypt 27,000,000 bushels. It might be noted that in the United Kingdom the production of barley of late years has been 70,000,000 bushels, and in European Russia, in 1888 (including Poland), it was reported as 152,000,000 bushels, the crop of Poland being over 11,000,000.

#### RYE.

The market was without noticeable features. A firm market at the close of 1888 led to liberal receipts, and the year 1889 opened with a large supply. The quantity in store on the 7th of January was 706,473 bushels, against 29,101 bushels upon the corresponding date of the previous year. The receipts for the year aggregated

2,605,984 bushels, which was largely of the grade of No. 2. The number of car-loads inspected was 4,483, and the quantity inspected, received by lake and canal, was 68,685 bushels. Shipments for the year footed up 2,801,366 bushels, against 1,744,380 bushels during the year next preceding.

The market did not exhibit any considerable strength until near the close of the year, when a foreign demand visited the market from Germany and Russia, and imparted confidence to the situation. The home demand was a good one, the distillers having taken a larger quantity of this grain than a year ago, due to reduced stocks of whiskey, and an improved market for this article. Throughout the year this grain was deprived of the support which in past years it had derived from the wheat market, and relying upon itself it would have been exceedingly unfavorable had not a good export demand come to its relief.

Prices for the year were about 20 cents per bushel lower for the better grades than during the year 1888, while for the ordinary qualities there was not more than a difference of from 6 to 8 cents per bushel. The entire crop was about 5,000,000 bushels in excess of that of last year, though the production in the States tributary to Chicago did not vary materially from that of the year preceding.

In the absence of speculation in this article, at no time during the year was there any special animation to the trade, and prices fluctuated within a narrow range. Cash rye sold at from 38 to 50 cents per bushel, the highest prices ruling in January and the lowest in June, recovering at the close of the year about 6 cents per bushel. No. 2 in January opened at 50 cents, easing off gradually to 47 cents at the close of the month. The weakness continued through February, selling down to  $43\frac{1}{4}$  cents. In March No. 2 sold for May delivery at from  $43\frac{1}{2}$  to 45 cents per bushel. In April a persistent weakness brought prices down to  $40\frac{1}{4}$  cents. In May the market was still weaker, though the depression was not violent. In June a further decline took place, and cash or spot rye sold as low as 38 cents. From this point a reaction brought the price up to 43 cents at the close of July, which price, however, was not maintained in the succeeding months, until November was reached, when the foreign demand infused new life into the market and cash rye crept up to 45 cents per bushel. From the November prices there was no material change through the closing month of the year.

## FLOUR.

The receipts of flour for the year amounted to 4,410,535 barrels, against 6,133,608 barrels received during the year 1888. The shipments aggregated 3,916,454 barrels, against 5,492,100 barrels shipped in 1888. The month of largest receipts was that of October. The proportion of this trade done direct from the mills is yearly increasing, though to a large extent transacted through commission merchants. It is much more economical for the miller to hold his flour at home until a sale is effected, than to ship to his commission merchant and incur charges for storage, cartage and cooperage. This method accounts for an apparent falling off of trade transacted by our flour merchants. Every possible device is used to reach the consumer with the least expense, and in accomplishing this result the commission merchant is in complete accord with the miller. All charges are reduced to a minimum.

There were 431,000 barrels of flour manufactured in Chicago during the year 1889. Circumstances do not favor the enlargement of the facilities for the manufacture of flour within the city, and consequently there has been no addition to the number of mills in Chicago for many years.

The number of barrels of flour exported from the principal Atlantic ports for the calendar year was 8,315,489, against 9,075,559 in 1888; the number exported during the fiscal year to Europe was 5,474,157, against 8,531,097 barrels in 1888.

The total exports of flour for the fiscal year from the United States to all foreign countries amounted to 9,374,803 barrels against 11,963,574 barrels in the year 1888; of which 4,974,680 barrels went to England, and 2,348,322 barrels to Scotland.

There are about 16,000 flour mills in the United States. The millers have realized this year more than ever before that the policy which they have persistently adhered to, of communicating direct with the consumer has not been advantageous to them. It has created a very sharp and active competition by greatly increasing the number of sellers, scattered all over the States, and millers' profits have been cut down to very small figures. The commission merchant, familiar with the market in all its phases, educated to deal with the purchaser, and a judge of the quality of flour with reference to the wants of the trade, is, as a matter of

course, specially qualified to manage sales to advantage. One traveling through the country distant from the principal markets cannot be fully informed of all the features of the trade, and must on many occasions be at the mercy of the buyer and in ignorance of important facts bearing upon prices.

A statement of the weekly range of prices for the various grades may be found on page 93. During the first half of the year prices were comparatively high, which had the effect of restricting sales, and of substituting, when possible, other articles of food, especially potatoes, turnips and all kinds of vegetables, which were obtainable at low prices. The export demand was, in consequence, also curtailed, and some difficulty and delay was involved in recovering this demand. The trade does not compare favorably with that of the year immediately preceding. A good yield of wheat in England and France prevented the usual volume of exports to those countries. Throughout the year the jobbers confined their purchases to actual wants. Prices declined about 20 per cent. during the year, and at the close of the year, winter wheats were sold at from \$3.80 to \$4.35 per barrel, and Western spring from \$3.25 to \$3.45 per barrel.

#### HAY.

The hay trade in 1889 was not as active or as large as during the year 1888, when it was stimulated by the drought of 1887. A large crop in 1889 caused a substantial diminution of orders from the East and South. The orders were also curtailed by reason of the poor condition in which our tame hay was harvested. During the critical period of the harvest we had the heaviest rains of the year, and only the very small portion that was cut before these excessive rains occurred was fit to be marketed. The bulk of the timothy hay crop was damaged by these rains, and was almost unsalable.

The quality of wild hay was very good, though not quite as large in quantity as in 1888. Prices have ruled lower on tame hay and higher on prairie hay than during the previous season. The very mild winter has restricted the consumption of this article to a great extent, leaving farmers more than an average surplus to send to market. Considering the low prices which have prevailed in this market, it seems to an impartial observer that if the farmers would pay as much attention to the harvesting of hay as they do to the raising and harvesting of grain, they would undoubtedly find

the hay crop quite as profitable as that of grain, even in such an off year as was the year 1889.

The receipts for the year are reported at 206,000 tons, against 250,000 tons for the previous year. Prices for No. 1 timothy ranged from \$9.00 to \$12.50 per ton; for No. 2, from \$7.00 to \$11.00 per ton; mixed, \$4.50 to \$10.50 per ton. Prairie hay from Illinois, \$3.50 to \$8.25; from Indiana, \$5.00 to \$8.00; from Kansas, \$6.00 to \$10.50; from Nebraska, \$8.00 to \$10.00; from Dakota, \$5.00 to \$8.50; from Minnesota, \$6.50 to \$7.00; from Wisconsin, \$4.50 to \$7.75; and from Iowa \$3.00 to \$12.00. No. 1 prairie hay sold from \$4.00 to \$7.00 per ton; No. 2 from \$3.50 to \$6.00 per ton.

#### SEEDS.

The receipts of all kinds of grass seeds for the year aggregated 84,599,331 pounds, against 75,724,021 pounds during 1888. The shipments amounted to 84,961,097 pounds, against 70,276,346 pounds for the year 1888. The month of largest receipts was that of September, when 16,204,643 pounds were received, and the month of largest shipments was that of March, when 16,965,000 pounds were shipped. The C., M. & St. P. R'y brought in 28,494,600 pounds during the year. The Pittsburgh, Ft. Wayne & Chicago Railroad took away 14,219,242 pounds, and by the Chicago & Grand Trunk Railway were shipped 12,619,061 pounds.

The prominence, indeed the pre-eminence, of Chicago as a seed market has been fully maintained, and the year will be characterized as an exceptional one, not only in respect to the great volume of business, but also as one recording the lowest prices for timothy seed since 1878, and the lowest prices for clover seed ever recorded.

The market for timothy seed during the first quarter of the year was comparatively steady and well sustained, mainly due to the moderate sized crop of 1888. Prices ranged from \$1.33 to \$1.58 per bushel, the highest price ruling in the month of January. A severe drought in many portions of the east and west stimulated the market, while an active foreign demand gave it an additional impulse extending through the first half of the year. Stocks were thus materially reduced. Favorable weather conditions brought about an indifferent demand at the close of the spring trade, and prices declined until \$1.18 per bushel represented the value of prime timothy in the month of

June. At this time unfavorable crop reports, based on dry weather, stimulated orders to purchase both on speculative and shipping account, until prices nearly recovered to the point realized at the beginning of the year. In July sales of prime were made at \$1.55 per bushel. From this time confidence in the stability of the advance became impaired, under the influence of liberal arrivals of new seed, to such an extent that receivers found it exceedingly difficult to dispose of their consignments. So pronounced was the weakness which followed, that seed to arrive was freely offered during the month of September. At this time the market became somewhat demoralized, and the price of prime timothy fell to \$1.14 per bushel, which was the lowest figure reached since 1878. A reaction set in as the result of the extreme depression, and the month of October brought a speculative demand which gathered strength as receipts began to diminish. Prices advanced to \$1.28 per bushel, but subsided from this point to \$1.24 at the close of the year.

The movement in clover seed was governed by the requirements for the actual necessities of the trade. The market did not develop any features promotive of speculation. There was a good supply in the stores of dealers at the beginning of the year, which varied in quantity but little for three months. During this time prices ranged from \$4.65 to \$5.35 per bushel. In April a marked decline took place, produced by a general desire to reduce stocks on hand, the demand at the prices which had prevailed having only absorbed current receipts. Under these conditions sales were made at \$4.25, declining to \$4.15 per bushel in May.

The prospect of the new crop was exceedingly favorable, causing a continued decline. September brought liberal arrivals of new seed and additional heaviness to the market, the decline not being arrested until sales were made at \$3.30 per bushel early in October, which was the lowest price ever reached. At this point the market attracted the attention of foreign buyers, and aroused a speculative demand. These features caused an advance in price to \$3.75 late in the season. This price, however, was not sustained, and a reaction brought quotations down to \$3.35 to \$3.40 per bushel. The crop was large but not uniform in quality, and was sent to market with but little care exercised in the assortment of grades.

There was a very small business transacted in Hungarian and millet seeds, and arrivals were insignificant, except during the

earlier months of the year. The prices of Hungarian ranged from 25 to 50 cents per bushel, and millet from 22 to 40 cents. The crop was a liberal one, though for obvious reasons but a small proportion was marketed.

#### LIVE STOCK AND PROVISION TRADE.

The business of the year in live stock and provisions has been of immense proportions.

The receipts of cattle for the year numbered 3,023,281, against 2,611,543 in 1888, 2,382,008 in 1887, and 1,963,000 in 1886, and are the largest during any year. The shipments numbered 1,259,971, against 968,385 in 1888, 791,483 in 1887, and 704,675 in 1886, exceeding those of any other year.

The receipts of calves numbered 122,968, against 96,086 in 1888, 65,859 in 1887, and 51,290 in 1886, largely exceeding those of any other year. The shipments numbered 35,576, against 23,663 in 1888, 15,956 in 1887, and 18,657 in 1886.

The receipts of sheep numbered 1,832,469, against 1,515,014 in 1888, 1,360,862 in 1887, and 1,008,790 in 1886, exceeding in number those ever before received during one year. The shipments numbered 711,315, against 601,241 in 1888, 445,094 in 1887, and 266,912 in 1886.

The receipts of horses numbered 79,926, against 55,333 in 1888, 46,404 in 1887, and 27,599 in 1886. The shipments numbered 73,311, against 52,866 in 1888, 46,155 in 1887, and 26,388 in 1886.

The receipts of hogs numbered 5,998,526, against 4,921,712 in 1888, 5,470,852 in 1887, and 6,718,761 in 1886.

The year of the largest receipts of hogs was that of 1880, when 7,059,355 were received.

The shipments of hogs during the year 1889 numbered 1,786,659, against 1,751,829 in 1888, 1,812,001 in 1887, and 2,090,784 in 1886.

The receipts of cattle, calves, hogs, sheep and horses for the year aggregated 11,057,170, received in 265,136 cars, valued at \$203,321,924, against 9,199,628 in 1888, valued at \$192,202,789.

The shipments of these animals numbered 3,866,832, forwarded in 101,622 cars, against 3,397,984 shipped in 1888, and 3,110,689 in 1887.

One cannot thoughtfully consider the foregoing statements

without amazement at the vast volume of business transacted at the Union Stock Yards of Chicago, which is the largest stock market in the world. The accuracy and dispatch with which enormous receipts are handled; the cleanliness attained, and the economy practiced in their preparation for the consumer, enable Chicago to maintain her pre-eminence as a live-stock market. Any numerical statement, without at least a partial inspection of the numerous appointments of the Stock Yards, and without a knowledge of the men who conduct the business which they represent, would fail to convey to one's mind the immense proportions of this industry, and the ability demanded for its prosecution.

The largest number of cattle ever received in one week was for the week ending October 5th, 1889, and was 82,356; the largest number of sheep ever received in one week was for the week ending September 28th, 1889, and was 52,307; the largest number of hogs ever received in one week was for the week ending November 20th, 1884, and was 300,488; the largest number of calves ever received in one week was for the week ending September 21, 1889, and was 5,642, and the largest number of horses ever received in one week was for the week ending March 20th, 1889, and was 2,708.

The total value of live stock received in this market during the last twenty-four years is \$2,976,636,569.00.

The average weight of cattle for the past year was over 1,100 pounds per head; of hogs 249 pounds, and of sheep 99 pounds.

The volume of receipts of cattle was very uniform throughout the year, averaging about 260,000 per month, and the proportion of cows received was much greater than for any other season.

The prices were lower than were ever before known. Native beef cattle, weighing from 1,200 to 1,350 pounds, sold at from \$2.60 to \$4.70 per 100 lbs., and from \$2.85 to \$5.35 for cattle weighing from 1,350 to 1,500 pounds, and from \$3.60 to \$6.00 for those weighing from 1,500 to 1,900 pounds.

The stream of consignments, particularly of cows and "half fat" steers, was not in the slightest degree interrupted during the year, but had not Chicago been possessed of almost unlimited means for taking care of these receipts, sales, instead of being made at comparatively low prices, would have been ruinous.

The market for sheep was favorable, and prices averaged higher than those of the year immediately preceding. The quality

of the far-west mutton was superior, and gave to our tables a delicious meat at moderate cost. Most of the sales of the year were made at from \$4.00 to \$4.55 per 100 lbs., and sheep from Texas and the remote west sold at from \$2.25 to \$5.50 per 100 lbs.

The business in hogs during the past year was a substantial improvement over that of the two preceding years. An abundant supply of corn produced hogs of a finer quality and of greater average weight than were ever before reported. The summer packing consumed 2,294,027 hogs, the average weight per head being 270 pounds. The winter packing of 1889-90 absorbed 2,179,440 hogs of an average weight per head of 260 pounds. The average weight per head of hogs packed during the winter season of 1888-9 was 279 pounds.

In January prices ranged from \$4.65 to \$5.30 per 100 lbs., steadily declining through the succeeding months, showing a range during December of from \$3.35 to \$3.85 per 100 lbs.

Through the kindness of Mr. George T. Williams, the Secretary of the Stock Yards, the following table, showing receipts of live stock for each year from 1880 to 1889, inclusive, is submitted:

Year.	Cattle and Calves. Number.	Hogs. Number.	Sheep. Number.	Horses. Number.	Aggregate value.
1880.....	1,382,477	7,059,355	335,810	10,398	\$143,057,626
1881.....	1,547,498	6,474,844	493,624	12,909	183,003,710
1882.....	1,607,495	5,817,504	620,887	13,856	196,670,221
1883.....	1,909,167	5,640,625	749,917	15,255	201,252,772
1884.....	1,870,050	5,351,967	801,630	18,602	187,387,680
1885.....	1,964,018	6,937,535	1,003,598	19,356	173,598,002
1886.....	2,015,100	6,718,761	1,008,790	27,599	166,741,754
1887.....	2,447,867	5,470,852	1,360,862	46,404	176,644,597
1888.....	2,707,629	4,921,712	1,515,014	55,333	182,202,789
1889.....	3,146,249	5,998,526	1,832,469	79,926	203,321,924

Our business in dressed beef is annually growing in volume and importance. Facilities for the prosecution of this industry are constantly being improved and multiplied to meet the varying demands of an extensive trade reaching into every market of the world. Thus, at a comparatively small expense, the best of meat food is provided for all classes of people, and is especially appreciated by those who heretofore were but scantily supplied with healthful and substantial fare. *The effect of this industry upon the productiveness of human labor in all avenues of effort cannot be otherwise than beneficial.*

The number of cattle slaughtered for the dressed beef, packing and canning business for the year ending March 1st, 1890, was 2,206,185, against 2,050,627 for the corresponding year 1888-9, and 1,963,051 for the corresponding year 1887-8.

The exports from the United States of beef products, including fresh beef, canned beef, and salted or pickled beef, for the fiscal year ending June 30th, 1889, aggregated 243,927,044 pounds, valued at \$18,900,398. Of these exports, England received 176,431,580 pounds, valued at \$13,885,896.

For the purpose of emphasis under this head, I repeat what in this review I have elsewhere stated, viz.: That the receipts at Chicago of dressed beef for the year aggregated 88,894,033 pounds, against 51,056,334 received during the year 1888. The production of dressed beef in this city during 1889 aggregated 870,833,116 pounds, against 724,427,013 pounds produced during 1888. The shipments of dressed beef from Chicago last year aggregated 959,727,149 pounds, or 184,243,802 pounds more than during 1888.

The market for mess pork opened at from \$12.80 to \$12.90 per barrel, declining by easy stages to \$11.00 per barrel on the 11th of February. From this date there was a reaction until sales were made in the latter part of March at \$11.85, when a uniform decline in prices began, continuing until sales were made at \$9.52 per barrel. During the month of September prices rapidly improved until sales were made on the 9th at \$11.65, when for October delivery \$11.75 per barrel was obtained. This advance was brought about by the manipulation of New York parties, who sought to control the market through a misinterpretation of the rule governing pork packed in the month of October. This attempt was frustrated by the decisions of the State and Federal courts, the official construction of the rule being sustained.

During October the market was fairly steady for cash pork at from \$10.15 to \$10.50 per barrel, except on the last day of the month, when prices declined to \$9.42½ to \$9.60 per barrel. During November sales ranged from \$8.90 to \$9.57½ per barrel, and in the closing month of the year, influenced by the reduced prices for hogs, sales were made at from \$8.35 to \$9.12½ per barrel, with very little doing in spot sales, most of the market transactions during this month being for January delivery.

The opening sales of the year for lard were made at \$7.32½ to

\$7.62½ per 100 lbs., but after the 12th day of January the market declined, and prices ranged from \$6.52½ to \$7.00, closing on the last day of the month at \$6.87½. The decline continued through the month of February, but without violent fluctuations, sales during the month ranging from \$6.52½ to \$6.95. A strong market prevailed in March, prices reaching to \$7.07½. During April the market was quiet, and prices were from \$6.82½ to \$6.97½. During the month of May the market was inactive, and sales were made as low as \$6.92½. The market suffered a material decline during the month of June, sales being made at from \$6.15 to \$6.62½. In July the decline continued, touching \$6.00 on the 29th. In August, while there was a slight recovery during the first part of the month, prices on the 26th ranged from \$5.90 to \$5.97½. The market in September exhibited no material change from its condition during the previous month. October witnessed a slight improvement, and sales were made as high as \$6.52½. The advance, however, was not maintained on the last of that month, sales then being made at \$6.15. The market for November was a quiet one at a decline from the prices of the previous month of about 20 cents per 100 lbs. In December the market was weak, and sales were made as low as \$5.77½ on the 26th. This price was not materially changed during the balance of the month.

Low prices and superior quality produced a large volume of trade throughout the year, preventing any undue accumulations of stock.

The receipts of lard for the year aggregated 99,952,687 pounds, showing an increase of 29,096,890 pounds over those of the year 1888. The shipments for the year amounted to 395,838,737 pounds, against 309,469,915 pounds during the year 1888. The Chicago production of lard for the year 1889 aggregated 295,886,050 pounds, against 238,614,118 pounds produced during 1888.

The exports from the United States for the fiscal year aggregated 318,242,990 pounds, of which 106,593,771 pounds were shipped to England and 48,664,002 pounds to Germany.

Short ribs were in good demand, especially from the Southern States. The trade from this section last year was not interrupted by the yellow fever. Prices in January opened at \$6.60, declining through the month, with slight reactions, until sales were made at \$6.05 per 100 lbs. The decline continued throughout Febru-

ary, recovering slightly in the beginning of March, though the cash market was nominal for the remainder of that month. The advance slipped away during April, when sales were made at \$5.82½. In May and June there was little doing, though prices declined to \$5.65. Trade revived in July, but prices still further declined until \$5.35 was quoted on the 31st of that month. August brought additional depressing influences, forcing prices down to \$4.85 per 100 lbs. The early autumn imparted more vigor to the trade, improving prices in September 45 cents per 100 lbs. These rates were fairly well sustained throughout the succeeding month. In November trade was moderate in volume, and the market price advanced to \$5.60 on the 29th. The December trade did not sustain the November prices, and the closing quotation of the year was \$4.67½ per 100 lbs.

The following statement exhibits the export movement of beef and hog products, in pounds, from 1882 to 1889, inclusive:

Year.	Fresh beef.	Salted beef.	Pork.	Bacon and ham.	Lard.
1889.....	137,895,391	55,006,399	64,133,639	400,224,646	318,242,990
1888.....	93,498,273	48,980,269	58,900,653	375,439,683	297,740,007
1887.....	83,560,874	36,287,188	85,893,297	419,922,955	321,533,746
1886.....	99,423,362	58,903,370	87,267,715	419,788,796	293,728,019
1885.....	115,780,830	48,143,711	72,073,468	400,126,119	283,216,339
1884.....	119,093,577	41,398,165	50,564,869	359,651,932	225,950,705
1883.....	116,928,727	46,443,037	67,759,872	423,874,985	277,034,680
1882.....	53,983,730	40,517,648	66,029,915	345,862,163	235,536,658

#### NAVIGABLE WATERWAY FROM LAKE MICHIGAN TO THE MISSISSIPPI.

Since my last report the sanitary district of Chicago has been organized under laws passed by the General Assembly of Illinois. These laws contemplate a navigable waterway not less than 160 feet wide, and not less than 18 feet deep across the "Chicago divide," from Lake Michigan at or near the mouth of the Chicago River, to Lockport, Ills., with a capacity to carry not less than 10,000 cubic feet of water per second, for the improvement of low water navigation of the Illinois and Mississippi Rivers, as well as to afford sanitary relief for Chicago.

The General Assembly also passed a joint resolution, asking for co-operation on the part of the United States, in the construction of a channel not less than 22 feet deep from Lake Michigan to Lake Joliet, and thence 14 feet deep to La Salle, from which

point the Illinois River is to be improved by dredging in an open channel in conjunction with a water supply from Lake Michigan. The resolution asks that these works be so designed as to permit future enlargement to a greater capacity, plainly foreshadowing the plan of a navigable waterway to the Gulf of Mexico, or of in part restoring to the Mississippi the old outlet of the great lakes which discharged across the present site of Chicago, and down the valleys of the Desplaines and Illinois Rivers.

The authorities of the sanitary district only wait for final confirmation of the law by the Supreme Court to enter upon the consummation of their part of the work, and to present to Congress a plan of co-operation by which a waterway of great magnitude can be completed at an early day.

The project of a waterway of large proportions via the Mississippi to the Gulf of Mexico is one of vast commercial importance, and it is hoped that it may be undertaken on such a scale and designed in such a manner that it may develop progressively until deep water to the gulf is achieved.

Then will be realized the dream of Gallatin, Clinton and Morris of a waterway from the Hudson River, via the lakes and the Mississippi, to the Gulf of Mexico. Such a line necessarily crosses the "Chicago divide." There is now before Congress a bill for the construction of a ship canal with a depth of 20 feet, for navigation into Lake Ontario, which would extend deep water 150 miles nearer the Atlantic.\*

We are justified in anticipating that a deep waterway will at some time be extended to the Hudson on the east and to the gulf on the south. The advantages of such a consummation would be incalculable, and whatever is done, should be done in harmony with this great policy.

There is, moreover, a question of large local importance involved in a channel of the depth of 22 feet, which is nothing less than a harbor for deep draft vessels of 20 feet, for which lake improvements are now in progress. A general call for this depth for harbors was made by the recent waterway convention at Superior City, Wis. Should a channel of the proper width be provided, it may be made to serve a harbor purpose, and gradually draw to itself the deeper commerce of the future without infringement of vested rights.

---

\*The "Soo" canal is being constructed for the same depth to Lake Superior.

Again, not only is the project of a waterway to the Mississippi and the gulf fraught with vast importance to the country at large, but its accomplishment would be of special advantage to Chicago. We are rapidly becoming a prominent manufacturing city, and are now the second manufacturing center in the Union. Cheap raw materials lie at the basis of successful manufacturing, and the enormous supplies of lumber in the south would find their way to Chicago, to meet the growing deficiency of like material in the north.

In the not distant future there must be a very substantial growth of commerce around the gulf, and with South America, and there is no good reason why the completion of a great waterway via the Mississippi would not establish a commercial intercourse between Chicago and the South equal in magnitude to that which we now enjoy via the great lakes with the Eastern States.

To carry out this project upon such a comprehensive and harmonious scale as would secure the co-operation of the national government, would provide Chicago with abundant sanitary relief for all time at no greater cost than by any other plan, and would ultimately reduce such relief, financially and otherwise, to the mere incident of a magnificent commercial purpose.

The varied information in this volume, having been compiled from official sources, with great care, is reliable. In this connection I desire to recognize the unvarying courtesy accorded me by the railway officials of this city. No body of gentlemen are more politely observant of the proprieties of business intercourse than the representatives of our transportation lines.

By virtue of her geographical position, of the wise ability of her citizens, of the extensive and exceptional facilities which she possesses, and by the generous recognition of her sister cities, Chicago will ere long, in commemoration of the discovery of this continent, invite hither in a spirit of enlightened rivalry the nations of earth, with the manifold evidences of their progress and greatness; that commerce, learning and international amity may be exalted, and that mankind may be led to higher achievements in all things that dignify human effort.

A complete and systematically arranged index may be found at the end of this report, which, with the table of contents, provides every facility for promptly consulting the subjects included in this volume.

The data presented in this report, and the inferences deducible therefrom, warrant us in confidently anticipating an unexampled prosperity in the near future.

Gratefully acknowledging the kindness shown me by the officary and membership of the Board, and with sentiments of personal esteem, I have the honor, Mr. President, to subscribe myself.

Very respectfully,

GEORGE F. STONE, *Sec'y.*

Signal Service Department; Wm. J. Onahan, Comptroller of the City of Chicago; London Miller; Vienna International Congress, etc.

## REPORT OF THE BOARD OF DIRECTORS.

---

*To the Members of the Board of Trade of the City of Chicago :*

GENTLEMEN—As required by the Rules, your Board of Directors herewith submit a full report of receipts and expenditures, properly classified, and an exhibit of the financial affairs of the Association.

Adhering to the policy inaugurated in 1888, which received the unanimous approval of the Association at its last annual meeting, the Directory purchased and canceled during the year \$50,000 of the bonds of the Board, leaving a surplus of \$18,398.63, notwithstanding the dues were \$20 less than in 1888. This, we think, constitutes a sufficient assurance that the financial affairs of the Board have been conducted with a wise and painstaking economy.

The bonded indebtedness due in 1933, at the option of the Board after 1893, is \$1,400,000, bearing interest at 5 per cent. per annum, payable semi-annually. In a few years this amount will have been so reduced that the indebtedness undoubtedly may be refunded at 4 per cent. per annum ; thus will a substantial saving be secured to the Board, and abundantly justify the wisdom of your financial policy. In this view, your Board of Directors fixed the dues for 1890 at \$70 per capita, the same as was assessed last year. When are considered the abundant privileges and facilities which they secure, and the provision which they include for the retirement of \$50,000 of the bonds of the Board, the assessment must be regarded as a moderate one.

Below is submitted a summary of receipts and expenditures :

### RECEIPTS.

1916 annual assessments, 1889, at \$70.....	\$134,120 00
3 assessments, 1888, paid in 1889, at \$90.....	270 00

		<hr/>
		\$282,168 99

The real estate of the Board, under the immediate supervision of your Real Estate Committee, has been sagaciously and faithfully managed. The offices are all rented, and the building is in good condition. Needed repairs have not been delayed by a false economy.

The business of the Board has been fairly satisfactory, and has been marked by a conservative mercantile conduct, which has prevented serious fluctuations in prices, and which imparts confidence in general financial soundness.

The receipts for the year of grain, and of flour in its grain equivalent, are 183,563,208 bushels, which is in excess of like receipts during any other year. The general movement of all kinds of produce, and of manufactures, has been exceedingly large. Its detailed statement may be found in the Secretary's report.

The legislature of Illinois has passed an act authorizing corporations existing under special charters to own and enjoy so much real and personal estate as shall be necessary for the transaction of their business. This enables the Board to pursue the policy of retiring its bonds without violating any of the terms of its charter.

Rates of freight have fluctuated less than in former years. This result may be attributed in large measure to the efforts of the Chicago Freight Bureau, which has rendered valuable service to the grain-receiving and provision interests. In justice to these important interests, your Directors recommend that the Board continue its connection with the Freight Bureau, and would urge the members to avail themselves of this agency in the presentation of their freight grievances, and, indeed, in all matters pertaining to freight complications and adjustments. Its office is in this building, and should be freely consulted whenever occasion suggests its usefulness.

Your Directors are gratified to report that the Chicago & Grand Trunk, Baltimore & Ohio and New York, Chicago & St. Louis railroads have constructed approved hopper scales for weighing and transferring grain. Your Committee on Weighing are urging the Railroad Commissioners to compel those lines which have not in all respects conformed to the statute, to promptly obey its mandates, in order that the grain grower, shipper and merchant may have that protection to which they are entitled. We hope for an early and full compliance upon the part of all east-bound railway lines with that law, whose provisions promote a common interest.

The Board of Directors sent delegates to the annual meeting of the National Board of Trade, held at Louisville, Ky., in the month of October last. The meeting was one of great importance, and, it is hoped, will be conducive to the commercial welfare of the country. An increased interest has been awakened in this organization as an influential channel through which the discussion of economic questions, by eminent and successful merchants, finds its way to State and National councils, thus preventing vicious and partially considered legislation upon many subjects vital to National commercial prosperity.

The power placed in the Board of Directors, to adjourn the Board by a two-third vote of their number, has proved both economical and wise. Propositions to amend the Rules have been fewer than in former years, from which may be properly inferred an absence of that spirit of restlessness which experience has shown betokens an unsatisfactory business condition.

The present membership of the Board is 1,923. The number of memberships transferred during the year, 211.

## MARKET QUOTATIONS.

The Supreme Court of this State has decided, in regard to the official quotations of this Board, as follows :

“ We do not wish to be understood as holding that the Board of Trade is bound by law to continue the business of collecting and furnishing to the public market quotations, or that it may not voluntarily abandon such business ; but we hold that so long as it continues to carry it on, either directly or indirectly, it must do so without unjust discrimination as to persons, and must furnish mar-

ket quotations to all who may desire to obtain them for lawful purposes and upon the same terms."

The question of gambling contracts, or so-called "bucket-shops," was not involved in this opinion.

Cases involving these quotation questions are now pending upon the trial calendar of the Circuit Court. The first in order to be reached is the case of Murphy against the Board of Trade. As soon as the Murphy case is reached, the Attorney of the Board proposes to try it and get a determination of the Court upon final hearing, as to the rights of the Board of Trade to have the injunction so modified as to permit the Board either to discontinue its quotations altogether, or to furnish them at such intervals as the Board shall see fit, provided all parties are treated alike; and also to introduce what proof can be obtained upon the question as to whether Murphy and other parties, complainants, are violating the bucket-shop law. In case of an adverse decision by the Circuit Court, he proposes to take an appeal to the Appellate Court of this district, and in case of an adverse ruling in that court, to then appeal to the Supreme Court of the State, and have all these questions finally determined; but it is deemed inexpedient to renew the motion to modify the injunction heretofore denied by the Circuit Court, before the case is reached for final hearing, for the reason that no appeal could be taken from an overruling of such motion.

The Murphy case will probably be reached during the month of January, unless some adverse circumstances should intervene, over which the Board and its attorneys have no control, which are not anticipated at this time.

The Directory is gratefully mindful of the generous co-operation of the membership of the Board in maintaining our rules, and in upholding that commercial integrity which has given to this organization a prominent position among the chief mercantile bodies of the world. Dullness in business we may not hope to wholly avoid, but we cannot doubt that this Association has in store for it, in the immediate future, a still greater prosperity and a more potent influence, which shall amply repay all who have, by a lofty enterprise and an unfaltering honesty, contributed to its success.

Death has come with its inexorable demands and taken fourteen members from our ranks. In the midst of our engrossing duties it is meet that we should pause and pay tribute to their virtues,

while we sorrowfully read the brief but impressive record of their departure :

Carried in foreign vessels—sailing .....

## RECAPITULATION BY GROUPS, ACCORDING TO SOURCE OF PRODUCTION.

Agriculture .....	\$532,141,790	Fisheries .....	\$ 6,995,002
Mining .....	19,947,736	Miscellaneous .....	5,425,966
Forest .....	26,997,127	Manufacturers .....	138,774,867
Total .....			\$730,282,488

Owing to the absence of law providing the means for collecting the statistics of exports by cars and other land vehicles, the exports to the Dominion of Canada by land carriage are very incomplete, and those overland to Mexico are entirely wanting.

# IMPORTS OF MERCHANDISE INTO THE UNITED STATES.

*The following table exhibits the value of imports of merchandise by commodities during 1887, 1888 and 1889—the years ending June 30.*

Commodities.	1889.	1888.	1887.
Sugar and molasses—sugar.....	\$88,580,641		
Molasses—Melada and syrup.....	4,753,897		
	\$93,334,538	\$79,760,891	\$83,789,670
Wool—raw .....	\$17,974,515		
manufactures of.....	52,564,942		
	70,539,457	63,606,610	61,327,197
Silk—raw.....	\$19,333,229		
manufactures of.....	35,122,766		
	54,455,995	53,282,681	50,990,720
Coffee.....	74,724,882	60,507,630	56,347,600
Iron and steel, and manufactures of.....	22,662,847	31,831,447	51,321,521
Chemicals, drugs, medicines, dyes, etc.....	37,620,953	36,999,718	38,546,314
Cotton—raw.....	\$ 1,194,505		
manufactures of.....	26,422,418		
	27,616,923	29,270,292	29,037,925
Hides and skins, other than furs.....	25,127,750	23,939,339	24,219,101
Tin, and manufactures of.....	28,237,148	27,737,906	6,927,696
Flax—raw.....	\$ 2,070,729		
manufactures of.....	16,190,202		
	18,261,031	17,088,706	16,229,761
Fruits and nuts .....	19,746,417	20,502,223	20,608,486
Tea.....	12,435,533	13,360,685	16,771,802
India rubber, gutta percha, and manufactures of.....	12,723,358	16,410,470	14,022,814
Breadstuffs and farinaceous food.....	8,971,722	9,661,783	7,361,632
Woods, and manufactures of.....	15,674,602	14,664,805	13,046,364
Leather, and manufactures of.....	11,296,322	11,971,759	11,190,945
Jute and other grasses—raw.....	\$8,963,972		
manufactures of.....	8,021,998		
	16,985,970	15,760,960	11,684,011
Wine, spirits and cordials.....	9,634,859	9,294,009	9,011,553
Tobacco, and manufactures of.....	14,610,990	14,377,790	12,176,463
Provisions, including eggs and fish.....	9,002,724	9,266,832	7,997,302
Earthen, stone, and china ware.....	6,476,199	6,410,871	5,716,927
Fancy goods, including perfumery and cosmetics.....	6,661,532	7,277,217	7,172,268
Furs, dressed and undressed.....	7,417,755	6,735,344	7,285,619
Glass and glassware.....	7,712,389	7,854,725	7,319,895
Precious stones.....	11,029,138	10,830,520	10,828,941
Articles exported and returned.....	5,857,788	8,461,319	9,256,932
Paper materials.....	5,925,047	5,463,036	4,540,598
Heinp, and manufactures of .....	10,927,127	8,437,694	6,332,089
Buttons and button materials.....	3,252,406	3,710,705	3,767,506
Animals, living.....	7,224,304	8,006,385	7,816,198
Books and other publications.....	4,068,957	3,883,416	3,688,991
Straw and palm-leaf, and manufactures of.....	4,197,077	6,336,353	.....
Paintings, photographs and statuary .....	1,646,235	2,210,518	2,806,998
Oils of all kinds.....	3,128,502	3,231,083	2,792,698
Watches and watch materials.....	1,662,118	1,662,096	1,503,240
Hair, and manufactures of.....	2,585,941	2,303,485	2,617,156
Barks, medicinal and other.....	1,455,795	1,713,785	1,014,609
Spices.....	3,376,973	3,529,245	3,481,412
Metals, and manufactures of (not otherwise stated).....	4,324,669	4,356,160	4,260,914
Household effects of immigrants and others.....	2,732,972	3,037,280	2,643,999
Coal.....	3,929,245	2,846,741	2,715,442
Paper, and manufactures of.....	2,542,383	2,400,790	2,028,235
Dye-woods in sticks.....	1,665,452	1,671,513	1,328,960
Seeds.....	5,007,223	2,839,421	1,448,307
Salt.....	943,131	1,156,962	1,438,031
Musical instruments.....	1,722,380	1,843,344	1,577,395
Paints of all kinds.....	1,294,811	1,244,320	1,214,283

## IMPORTS OF MERCHANDISE.—CONTINUED.

Commodities.	1889.	1888.	1887.
Bristles .....	\$ 1,284,724	\$ 1,215,325	\$ 1,174,333
Cocoa .....	2,142,061	2,251,773	1,670,012

NOTE.—Prior to the year 1820 no official records of the arrival of alien passengers were kept. It is estimated, however, that the total number arriving in the United States from the foundation of the government to the year 1820 was 250,000.

The total number of immigrants arriving in the United States from 1856 to 1889, inclusive, was 10,615,800. Up to 1856 no record was kept of distinctly immigrants separate from the arrival of alien passengers.

Of the number of immigrants arriving during the year ending June 30, 1889, 69,684 came from England and Wales, 65,557 from Ireland, 18,296 from Scotland, 99,538 from Germany, 118 from China, 48,805 from Norway and Sweden.

The number of immigrants arriving during the year ending June 30, 1889, is 102,462 less than arrived during the year next preceding, and 344,565 less than during the year ending June 30, 1882, which was the year of the greatest immigration.

Of the number of immigrants arriving during the last fiscal year 41 per cent. were females.

Owing to the absence of law for the collection of statistics of immigration by railroads, immigrants from the British North American possessions and Mexico are not included.

In the above statistics, since July 1st, 1885, of the number of immigrants arriving 263,024 were males and 181,403 females.

1889-90	2,548,002	28½	9,159,038	8,352,000	.....	.....	.....	.....	38,140,000	26,698,000	.....

NOTE.—In the above table the estimated yield per acre was, up to 1884, that of the best authorities, helped by a calculation of the results in each season; in the following years the Government figures have been adopted. In estimating the rate of consumption the conventional rate of 5½ bushels per capita is taken up to 1880-81, since when the rate of 5.6 bushels per capita has been assumed, such being considered nearer the actual consumption.

## BUCKWHEAT AND POTATOES.

NOTE.—Up to 1850 only the aggregate valuations in the several counties were reported to the state officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of real estate and personal property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law. Since 1868 the valuations are as equalized. The total valuations in each of the several years are correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, especially those of railroad property.

The state debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December 1.

## CHICAGO REAL ESTATE AND PERSONAL PROPERTY.

NOTE.—From 1851 to 1862, inclusive, a lamp tax of half a mill to two mills was levied on certain portions of the city, and is included in the above total tax. The city debt as noted represents it as it stood on February 10 in 1855 to 1854, inclusive; on February 1 in 1855 to 1861, inclusive; on April 1 in 1862 to 1874, inclusive; and on December 31, since 1874. Valuations for 1855 to 1883, inclusive, are by the county assessment, as equalized by the State Board of Equalization, and in some of these years do not include railroad property. The city tax on railroad property for 1862 and 1883, something over \$100,000 for each year, is not included in the above total tax. The above figures for 1889 include the districts annexed to the city of Chicago July 15 of that year.

## CANAL STATISTICS—(OFFICIAL).

The following statement shows the expenses of repairs, renewals, etc.; also the tolls collected, with the dates of the opening and closing of the Illinois and Michigan Canal, from 1848 to 1889, inclusive :

Year.	Ordinary repairs.	Extra'd'y repairs, renewals, and hyd. works.	Gross expenses.	Tolls.	Canal opened.	Canal closed.	No. of days open.

(a) The figures of production for 1872, 1873, 1874, and 1878 are taken from the New York Commercial and Financial Chronicle, and from 1875 to 1887, inclusive, from the reports of the National Cotton Exchange of America.

For the years 1888 and 1889 the amount placed opposite each fiscal year in the column of production is the crops grown during the preceding calendar year, and comprises port receipts, overland shipments to northern mills, and southern consumption during the year ending August 31.

(b) The net weight of bales is stated on the authority of Mr. Thomas Ellison, of Liverpool, and the gross weight for the year prior to 1878, on the authority of Mr. J. R. Dodge, Statistician of the Department of Agriculture, and from the year 1877 to 1887, inclusive, as reported by the National Cotton Exchange.

(a) Rhode Island and Massachusetts. (b) Exclusive of 5,321,706 tons, colliery consumption.

NOTES.—The statistics for 1890, 1870 and 1880 are derived from the United States census. The statistics for the remaining years, except for 1887, are compiled from data collected and estimates made by Mr. Frederick E. Seward, editor of the Coal Trade Journal of New York, and those for 1887 are furnished by the United States Geological Survey.

According to the compendium of the census for 1860, the value of the coal mined in the United States in 1850 was \$7,173,750.

## ALL-RAIL THROUGH BUSINESS.

The following statement shows the amount of flour and grain received at Chicago during 1889, by western railroads, and delivered to connecting lines without passing through a Chicago warehouse, as reported by such roads. These amounts are all included in the general statements of receipts and shipments published herewith, except shipments originating in Milwaukee; these are deducted from the receipts and shipments of Chicago, as shown by the general statements, but are included in this:

*Received by the Chicago & North-Western Railroad.*

# VISIBLE SUPPLY OF GRAIN, 1888.

*Statement of the weekly stocks of grain in regularly authorized warehouses at prominent grain centers of the United States and Canada, excepting California, including the quantities afloat on the lakes, and on the Erie Canal, presenting the visible supply of grain in the United States and Canada not disposed of with reference to ultimate destination; but easily obtainable to influence the markets, or to supply any unexpected demand.*

# RULES GOVERNING THE INSPECTION OF GRAIN

## IN THE CITY OF CHICAGO, STATE OF ILLINOIS.

The following are the rules adopted by the Board of Railroad and Warehouse Commissioners establishing a proper number and standard of grades for the inspection of grain, as revised by them; the same to take effect on and after the seventh day of October, 1889, in lieu of all rules on the same subject heretofore existing:

### RULE I.—WINTER WHEAT.

**White Winter.** No. 1 White Winter Wheat shall be pure White Winter Wheat, or Red and White mixed, sound, plump and well cleaned.

No. 2 White Winter Wheat shall be White Winter Wheat, or Red and White mixed, sound and reasonably clean.

No. 3 White Winter Wheat shall include White Winter Wheat, or Red and White mixed, not clean and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 White Winter Wheat shall include White Winter Wheat damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

**Long Red.** No. 1 Long Red Winter Wheat shall be pure Red Winter Wheat of the long-berried varieties; sound, plump and well cleaned.

No. 2 Long Red Winter Wheat shall be of the same varieties as No. 1; sound and reasonably clean.

**Turkish Winter.** Turkish Red Winter Wheat.—The grades of Nos. 1 and 2 Turkish Red Winter Wheat shall correspond with the grades of Nos. 1 and 2 Red Winter Wheat, except that they shall be of the Turkish variety.

In case of mixture of Turkish Red Winter Wheat with Red Winter Wheat it shall be graded according to the quality thereof and classed as Turkish Wheat.

**Red Winter.** No. 1 Red Winter Wheat shall be pure Red Winter Wheat of both light and dark colors of the shorter-berried varieties; sound, plump and well cleaned.

No. 2 Red Winter Wheat shall be Red Winter Wheat of both light and dark colors; sound and reasonably clean.

No. 3 Red Winter Wheat shall include Red Winter Wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 Red Winter Wheat shall include Red Winter Wheat damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

In case of the mixture of Red and White Winter Wheat it shall Mixture. be graded according to the quality thereof and classed as White Winter Wheat.

No. 1 Colorado Wheat shall be sound, plump and well cleaned. Colorado.

No. 2 Colorado Wheat shall be sound, reasonably clean and of good milling quality.

No. 3 Colorado Wheat shall include Colorado Wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

#### RULE II.—SPRING WHEAT.

No. 1 Hard Spring Wheat shall be sound, plump and well cleaned. Hard Spring.

No. 2 Hard Spring Wheat shall be sound, reasonably clean and of good milling quality.

No. 1 Spring Wheat shall be sound, plump and well cleaned. Spring Wheat.

No. 2 Spring Wheat shall be sound, reasonably clean and of good milling quality.

No. 3 Spring Wheat shall include all inferior, shrunken, or dirty Spring Wheat, weighing not less than fifty-three pounds to the measured bushel.

No. 4 Spring Wheat shall include Spring Wheat damp, musty, grown, badly bleached, or for any cause which renders it unfit for No. 3.

The grades of Nos. 1, 2 and 3 White Spring Wheat shall correspond with the grades Nos. 1, 2 and 3 Spring Wheat; except that they shall be of the White variety, or shall contain 5 per cent. or more of such White Wheat.

Black Sea and Flinty Pffe Wheat shall in no case be inspected higher than No. 2, and Rice Wheat no higher than No. 4.

#### RULE II<sup>1</sup>.—MIXED WHEAT.

The grades of Nos. 2 and 3 Mixed Wheat shall be equal in quality to the grades Nos. 2 and 3 Red Winter Wheat; except that they shall include mixtures of Spring and Winter Wheat.

## RULE III.—CORN.

Yellow. No. 1 Yellow Corn shall be yellow, sound, dry, plump and well cleaned.

No. 2 Yellow Corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.

No. 3 Yellow Corn shall be three-fourths yellow, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

White. No. 1 White Corn shall be sound, dry and plump, and well cleaned.

No. 2 White Corn shall be seven-eighths white, dry, reasonably clean, but not plump enough for No. 1.

No. 3 White Corn shall be seven-eighths white, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 1. No. 1 Corn shall be mixed Corn of choice quality, sound, dry and well cleaned.

No. 2. No. 2 Corn shall be mixed Corn, dry, reasonably clean, but not good enough for No. 1.

No. 3. No. 3 Corn shall be mixed Corn, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 4. No. 4 Corn shall include all Corn, not wet or in heating condition, that is unfit to grade No. 3.

## RULE IV.—OATS.

White. No. 1 White Oats shall be white, sound, clean and reasonably free from other grain.

No. 2 White Oats shall be seven-eighths white, sweet, reasonably clean and reasonably free from other grain.

No. 3 White Oats shall be seven-eighths white, but not sufficiently sound and clean for No. 2.

No. 1. No. 1 Oats shall be mixed Oats, sound, clean and reasonably free from other grain.

No. 2. No. 2 Oats shall be sweet, reasonably clean and reasonably free from other grain.

No. 3. No. 3 Oats shall be all Oats that are damp, unsound, dirty, or from any other cause unfit for No. 2.

## RULE V.—RYE.

No. 1. No. 1 Rye shall be sound, plump and well cleaned.

No. 2. No. 2 Rye shall be sound, reasonably clean and reasonably free from other grain.

No. 3. All Rye damp, musty, dirty, or from any cause unfit for No. 2, shall be graded as No. 3.

## RULE VI.—BARLEY.

No. 1. Barley shall be plump, bright, clean and free from other No. 1. grain.

No. 2 Barley shall be sound, of healthy color, not plump enough No. 2. for No. 1, reasonably clean and reasonably free from other grain.

No. 3 Barley shall include slightly shrunken and otherwise slight- No. 3. ly damaged Barley not good enough for No. 2.

No. 4 Barley shall include all Barley fit for malting purposes not No. 4. good enough for No. 3.

No. 5 Barley shall include all Barley which is badly damaged, or No. 5. from any cause unfit for malting purposes; except that Barley which has been chemically treated shall not be graded at all.

The grades of Nos. 1, 2 and 3 Scotch Barley shall correspond in Scotch. all respects with the grades of Nos. 1, 2 and 3 Barley; except that they shall be of the Scotch variety.

The grades of Nos. 1, 2 and 3 Bay Brewing Barley shall conform Bay Brewing. in all respects to the grades of Nos. 1, 2 and 3 Barley; except that they shall be of the Bay Brewing variety grown in the territories and on the Pacific coast.

The grades of Nos. 1, 2 and 3 Chevalier Barley shall conform in Chevalier. all respects to the grades of Nos. 1, 2 and 3 Barley; except that they shall be of the Chevalier variety grown in the territories and on the Pacific coast.

## RULE VII.

The word "new" shall be inserted in each certificate of inspection of a new harvested crop of Oats until the 15th of August, of Rye until the first day of September, of Wheat until the first day of November, and of Barley until the first day of May of each year. This change shall be construed as establishing a new grade, for the time specified, to conform in every particular to the existing grades of grain; excepting the distinctions of "new" and "old."

## RULE VIII.

All grain that is warm, or that is in a heating condition, or is otherwise unfit for warehousing, shall not be graded.

## RULE IX.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

## RULE X.

Each inspector is required to ascertain the weight per measured bushel of each lot of Wheat inspected by him and note the same on his book.

## ADMINISTRATION AND WAREHOUSE REGISTRATION.

---

*Extracts from the rules adopted by the Railroad and Warehouse Commissioners for the administration of the departments of grain inspection and warehouse registration in the city of Chicago in force from and after November 1, 1889.*

“Plugged,”  
“Loaded,” or  
“Scoured”  
Grain.      “The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been “plugged,” or otherwise improperly “loaded,” for the purpose of deception. Wheat which has been subjected to “scouring,” or to some process equivalent thereto, shall not be graded higher than No. 3.”

Attempts at  
Fraud, or  
Interference.      “All persons employed in the inspection of grain shall promptly report to the Chief Inspector, in writing, all attempts to defraud the system of grain inspection established by law, and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt.”

“They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission.”

*Extracts from the Law of Illinois, Revised Statutes, Chap. 114, Sec. 138.*

“Any duly authorized Inspector of Grain who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty, or the improper performance of any duty, as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100, nor more than \$1,000, in the discretion of the Court, or shall be imprisoned in the county jail not less than three, nor more than twelve months, or both, in the discretion of the Court.”

## RATES FOR INSPECTING AND WEIGHING.

### GRAIN (STATE INSPECTION).

For inspecting grain from cars, per car.....	\$0 30
For inspecting grain from wagons, per load.....	10
For inspecting grain from canal-boats, per M bu.....	40
For inspecting grain to vessels, per M bu.....	50
For inspecting grain to cars, in bulk, per car.....	35
For inspecting grain to teams, per car.....	35
For inspecting grain to teams, per load .....	10
For inspecting grain in sacks, per bu.....	00¼

P. BIRD PRICE, *Chief Inspector.*

*Railroad and warehouse commissioners, in charge of grain inspection:*

JOHN R. WHEELER,

ISAAC N. PHILLIPS,

C. L. CRIM.

*Registrar:*

J. W. BURST, Room 808, 218 La Salle street.

*Committee of appeals on grain inspection:*

THOS. H. FOSTER,

W. N. BRAINARD,

J. MANSFIELD.

### FLOUR.

For inspecting flour, per brl., or its equivalent in sacks.....	\$0 02
---	--------

R. W. RATHBORNE, *Chief Inspector.*

### PROVISIONS.

*Sampling, including re-packing and coopering:*

For inspecting beef and pork—for the first five barrels, per brl.....	\$0 80
For inspecting beef and pork—for each additional brl.....	25
For inspecting S. P. meats—for the first five tierces, per tc.....	1 00
For inspecting S. P. meats—for each additional tc.....	25
For inspecting boxed meats—for the first five boxes, per box.....	1 00
For inspecting boxed meats—for each additional box.....	50

*In case the whole of the lot is inspected, not including labor and coopering:*

For inspecting beef and pork, per brl.....	\$0 10
For inspecting S. P. meats—in lots of fifty tierces or more, per tc.....	12½
For inspecting S. P. meats—in lots of less than fifty tierces, per tc.....	15
For inspecting S. P. meats—in lots of one hundred tierces or more, per tc..	10
For inspecting bulk or boxed meats—in car-load lots or more, per M lbs..	15
For inspecting lard—in lots of one hundred tierces or more, per tc. ....	04
For inspecting tallow and grease, per tc.....	05

I. T. SUNDERLAND, *Chief Inspector.*

## FLAXSEED.

For inspecting flaxseed received in bulk—for each car-load of one grade,	\$0 75
For inspecting flaxseed received in bulk—where two or more grades are found in the same car—for each grade.....	50
For each one thousand bushels from elevator or warehouse to lake transportation .....	75
For each two-bushel bag.....	00½
For each four-bushel bag.....	01
For each wagon-load*.....	16¾

S. H. STEVENS, *Chief Inspector.*

## GRAIN BY SAMPLE.

For inspecting grain by sample, per car. ....	\$0 30
For inspecting grain from warehouse, per M bu.....	25

H. B. OWEN, }  
 WM. McDOUGALL, } *Inspectors.*

Totals .....	2,050,627	1,963,051	1,608,202	1,402,613

\*Slaughtered at Hammond, Ind., and partially reported in the shipments of live.

It is impossible to present the number of cattle slaughtered for each department of trade. It is estimated that about 1,700,000 head were required for the dressed beef, packing and canning trade. Messrs. Swift & Co. and G. H. Hammond & Co. confine their operations to shipping in carcass, while Messrs. Armour & Co. and the Fairbank Canning Co. extend their business to all departments, and Messrs. Libby, McNeil & Libby restrict their operations to the packing, canning, and city trade branches.

## PROOF SPIRITS (HIGHWINES).

The following table indicates the current prices of pure proof spirits. The sale of highwines is almost obsolete, proof spirits taking their place in the demand from rectifiers. At other distilling points there is still a slight demand for highwines, and the price is considered a basis for all kinds of distilled spirits and their manufactured product; such markets quote the prices of highwines, while Chicago quotes proof spirits, a product of highwines.
